7 Class Documentation 19

7.1 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.AccessDeniedModel Class Reference . . . 19

7.1.1 Detailed Description . . . 20

7.1.2 Constructor & Destructor Documentation . . . 20

7.1.2.1 AccessDeniedModel() . . . 20

7.1.3 Member Function Documentation . . . 20

7.1.3.1 OnGet() . . . 20

7.2 ZarzadzanieBiblioteka.Data.ApplicationDbContext Class Reference . . . 20

7.2.1 Constructor & Destructor Documentation . . . 21

7.2.1.1 ApplicationDbContext() . . . 21

7.2.2 Member Function Documentation . . . 21

7.2.2.1 OnConfiguring() . . . 21

7.2.2.2 OnModelCreating() . . . 21

7.2.3 Property Documentation . . . 21

7.2.3.1 Autorzy . . . 21

7.2.3.2 Biblioteki . . . 21

7.2.3.3 Ksiazki . . . 21

7.2.3.4 Opinie . . . 22

7.2.3.5 Rezerwacje . . . 22
7.2.3.6 Uzytkownicy . . . 22
7.2.3.7 Woluminy . . . 22
7.2.3.8 Wypozyczenia . . . 22
7.3 ZarzadzanieBiblioteka.Data.Migrations.ApplicationDbContextModelSnapshot Class Reference . . . 22
7.3.1 Member Function Documentation . . . 23
7.3.1.1 BuildModel() . . . 23
7.4 ZarzadzanieBiblioteka.Models.Autor Class Reference . . . 23
7.4.1 Detailed Description . . . 23
7.4.2 Property Documentation . . . 23
7.4.2.1 Id . . . 23
7.4.2.2 Imie . . . 23
7.4.2.3 Ksiazki . . . 24
7.4.2.4 Nazwisko . . . 24
7.5 ZarzadzanieBiblioteka.Controllers.BaseController Class Reference . . . 24
7.5.1 Detailed Description . . . 24
7.5.2 Constructor & Destructor Documentation . . . 24
7.5.2.1 BaseController() . . . 24
7.5.3 Member Function Documentation . . . 25
7.5.3.1 OnActionExecuting() . . . 25
7.5.4 Member Data Documentation . . . 25
7.5.4.1 _dbContext . . . 25
7.6 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel Class Reference . . . 25
7.6.1 Constructor & Destructor Documentation . . . 26
7.6.1.1 BasePageModel() . . . 26
7.6.2 Member Function Documentation . . . 26
7.6.2.1 OnPageHandlerExecuting() . . . 26
7.6.3 Member Data Documentation . . . 27
7.6.3.1 dbContext . . . 27
7.7 ZarzadzanieBiblioteka.Models.Biblioteka Class Reference . . . 27
7.7.1 Detailed Description . . . 27
7.7.2 Property Documentation . . . 27
7.7.2.1 Id . . . 27
7.7.2.2 KodPocztowy . . . 28

7.7.2.6 NumerBudynku . . . 28
7.7.2.7 Ulica . . . 28
7.8 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ChangePasswordModel Class Reference 29
7.8.1 Constructor & Destructor Documentation . . . 30
7.8.1.1 ChangePasswordModel() . . . 30

7.8.2 Member Function Documentation . . . 30
7.8.2.1 OnGetAsync() . . . 30
7.8.2.2 OnPostAsync() . . . 30
7.8.3 Property Documentation . . . 30
7.8.3.1 Input . . . 30
7.8.3.2 StatusMessage . . . 30
7.9 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ConfirmEmailChangeModel Class Reference . . . 31
7.9.1 Constructor & Destructor Documentation . . . 31
7.9.1.1 ConfirmEmailChangeModel() . . . 31
7.9.2 Member Function Documentation . . . 32
7.9.2.1 OnGetAsync() . . . 32
7.9.3 Property Documentation . . . 32
7.9.3.1 StatusMessage . . . 32
7.10 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ConfirmEmailModel Class Reference . . . 32
7.10.1 Constructor & Destructor Documentation . . . 33
7.10.1.1 ConfirmEmailModel() . . . 33
7.10.2 Member Function Documentation . . . 33
7.10.2.1 OnGetAsync() . . . 33
7.10.3 Property Documentation . . . 33
7.10.3.1 StatusMessage . . . 33
7.11 ZarzadzanieBiblioteka.Controllers.ContactController Class Reference . . . 34
7.11.1 Detailed Description . . . 34
7.11.2 Constructor & Destructor Documentation . . . 34
7.11.2.1 ContactController() . . . 34
7.11.3 Member Function Documentation . . . 35
7.11.3.1 Index() . . . 35
7.11.3.2 Send() . . . 35
7.12 ZarzadzanieBiblioteka.Data.Migrations.CreateIdentitySchema Class Reference . . . 35
7.12.1 Member Function Documentation . . . 36
7.12.1.1 BuildTargetModel() . . . 36
7.12.1.2 Down() . . . 36
7.12.1.3 Up() . . . 36
7.13 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.DeletePersonalDataModel Class Reference . . . 36
7.13.1 Constructor & Destructor Documentation . . . 37
7.13.1.1 DeletePersonalDataModel() . . . 37
7.13.2 Member Function Documentation . . . 37
7.13.2.1 OnGet() . . . 37
7.13.2.2 OnPostAsync() . . . 37
7.13.3 Property Documentation . . . 38
7.13.3.1 Input . . . 38
7.13.3.2 RequirePassword . . . 38

7.14 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Disable2faModel Class Reference . . 38
7.14.1 Constructor & Destructor Documentation . . . 39
7.14.1.1 Disable2faModel() . . . 39
7.14.2 Member Function Documentation . . . 39
7.14.2.1 OnGet() . . . 39
7.14.2.2 OnPostAsync() . . . 39
7.14.3 Property Documentation . . . 39
7.14.3.1 StatusMessage . . . 39
7.15 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.DownloadPersonalDataModel Class Reference . . . 40
7.15.1 Constructor & Destructor Documentation . . . 40
7.15.1.1 DownloadPersonalDataModel() . . . 40
7.15.2 Member Function Documentation . . . 41
7.15.2.1 OnGet() . . . 41
7.15.2.2 OnPostAsync() . . . 41
7.16 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EmailModel Class Reference . . . 41
7.16.1 Constructor & Destructor Documentation . . . 42
7.16.1.1 EmailModel() . . . 42
7.16.2 Member Function Documentation . . . 42
7.16.2.1 OnGetAsync() . . . 42
7.16.2.2 OnPostChangeEmailAsync() . . . 42
7.16.2.3 OnPostSendVerificationEmailAsync() . . . 43
7.16.3 Property Documentation . . . 43
7.16.3.1 Email . . . 43
7.16.3.2 Input . . . 43
7.16.3.3 IsEmailConfirmed . . . 43
7.16.3.4 StatusMessage . . . 43
7.17 ZarzadzanieBiblioteka.Models.EmailService Class Reference . . . 43
7.17.1 Detailed Description . . . 44
7.17.2 Constructor & Destructor Documentation . . . 44
7.17.2.1 EmailService() . . . 44
7.17.3 Member Function Documentation . . . 44
7.17.3.1 SendEmailAsync() . . . 44
7.18 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EnableAuthenticatorModel Class Reference . . . 45
7.18.1 Constructor & Destructor Documentation . . . 46
7.18.1.1 EnableAuthenticatorModel() . . . 46
7.18.2 Member Function Documentation . . . 46
7.18.2.1 OnGetAsync() . . . 46
7.18.2.2 OnPostAsync() . . . 46
7.18.3 Property Documentation . . . 46
7.18.3.1 AuthenticatorUri . . . 46
7.18.3.2 Input . . . 46

7.18.3.3 RecoveryCodes . . . 47
7.18.3.4 SharedKey . . . 47
7.18.3.5 StatusMessage . . . 47
7.19 ZarzadzanieBiblioteka.Areas.Identity.Pages.ErrorModel Class Reference . . . 47
7.19.1 Detailed Description . . . 48
7.19.2 Member Function Documentation . . . 48
7.19.2.1 OnGet() . . . 48
7.19.3 Property Documentation . . . 48
7.19.3.1 RequestId . . . 48
7.19.3.2 ShowRequestId . . . 48
7.20 ZarzadzanieBiblioteka.Models.ErrorViewModel Class Reference . . . 48
7.20.1 Detailed Description . . . 49
7.20.2 Property Documentation . . . 49
7.20.2.1 RequestId . . . 49
7.20.2.2 ShowRequestId . . . 49
7.21 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ExternalLoginModel Class Reference . . . 49
7.21.1 Constructor & Destructor Documentation . . . 50
7.21.1.1 ExternalLoginModel() . . . 50
7.21.2 Member Function Documentation . . . 51
7.21.2.1 OnGet() . . . 51
7.21.2.2 OnGetCallbackAsync() . . . 51
7.21.2.3 OnPost() . . . 51
7.21.2.4 OnPostConfirmationAsync() . . . 51
7.21.3 Property Documentation . . . 51
7.21.3.1 ErrorMessage . . . 51
7.21.3.2 Input . . . 51
7.21.3.3 ProviderDisplayName . . . 52
7.21.3.4 ReturnUrl . . . 52
7.22 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ExternalLoginsModel Class Reference 52
7.22.1 Constructor & Destructor Documentation . . . 53
7.22.1.1 ExternalLoginsModel() . . . 53
7.22.2 Member Function Documentation . . . 53
7.22.2.1 OnGetAsync() . . . 53
7.22.2.2 OnGetLinkLoginCallbackAsync() . . . 53
7.22.2.3 OnPostLinkLoginAsync() . . . 54
7.22.2.4 OnPostRemoveLoginAsync() . . . 54
7.22.3 Property Documentation . . . 54
7.22.3.1 CurrentLogins . . . 54
7.22.3.2 OtherLogins . . . 54
7.22.3.3 ShowRemoveButton . . . 54
7.22.3.4 StatusMessage . . . 54
7.23 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ForgotPasswordConfirmation Class Reference 55

7.23.1 Detailed Description . . . 55
7.23.2 Constructor & Destructor Documentation . . . 55
7.23.2.1 ForgotPasswordConfirmation() . . . 55
7.23.3 Member Function Documentation . . . 56
7.23.3.1 OnGet() . . . 56
7.24 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ForgotPasswordModel Class Reference . . . 56
7.24.1 Constructor & Destructor Documentation . . . 57
7.24.1.1 ForgotPasswordModel() . . . 57
7.24.2 Member Function Documentation . . . 57
7.24.2.1 OnPostAsync() . . . 57
7.24.3 Property Documentation . . . 57
7.24.3.1 Input . . . 57
7.25 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.GenerateRecoveryCodesModel Class Reference . . . 57
7.25.1 Constructor & Destructor Documentation . . . 58
7.25.1.1 GenerateRecoveryCodesModel() . . . 58
7.25.2 Member Function Documentation . . . 58
7.25.2.1 OnGetAsync() . . . 58
7.25.2.2 OnPostAsync() . . . 59
7.25.3 Property Documentation . . . 59
7.25.3.1 RecoveryCodes . . . 59
7.25.3.2 StatusMessage . . . 59
7.26 ZarzadzanieBiblioteka.Controllers.HomeController Class Reference . . . 59
7.26.1 Detailed Description . . . 60
7.26.2 Constructor & Destructor Documentation . . . 60
7.26.2.1 HomeController() . . . 60

Namespace Index

2.1 Package List

Here are the packages with brief descriptions (if available):

ZarzadzanieBiblioteka 15
ZarzadzanieBiblioteka.Areas 15
ZarzadzanieBiblioteka.Areas.Identity 15
ZarzadzanieBiblioteka.Areas.Identity.Pages 15
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account 16
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage 16
ZarzadzanieBiblioteka.Controllers 17
ZarzadzanieBiblioteka.Data 17
ZarzadzanieBiblioteka.Data.Migrations 17
ZarzadzanieBiblioteka.Models 18

Chapter 3

Hierarchical Index

3.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

ZarzadzanieBiblioteka.Models.Autor . . . 23
ZarzadzanieBiblioteka.Models.Biblioteka . . . 27
Controller
  ZarzadzanieBiblioteka.Controllers.BaseController . . . 24
    ZarzadzanieBiblioteka.Controllers.ContactController . . . 34
    ZarzadzanieBiblioteka.Controllers.HomeController . . . 59
    ZarzadzanieBiblioteka.Controllers.LibraryController . . . 79
ZarzadzanieBiblioteka.Models.EmailService . . . 43
ZarzadzanieBiblioteka.Models.ErrorViewModel . . . 48
IdentityDbContext
  ZarzadzanieBiblioteka.Data.ApplicationDbContext . . . 20
IdentityUser
  ZarzadzanieBiblioteka.Models.Uzytkownik . . . 122
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ExternalLoginModel.InputModel . . . 65
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ForgotPasswordModel.InputModel . . . 65
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginModel.InputModel . . . 66
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginWith2faModel.InputModel . . . 67
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginWithRecoveryCodeModel.InputModel . . . 68
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ChangePasswordModel.InputModel . . . 69
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.DeletePersonalDataModel.InputModel . . . 70
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EmailModel.InputModel . . . 71
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EnableAuthenticatorModel.InputModel . . . 71
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.IndexModel.InputModel . . . 72
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.SetPasswordModel.InputModel . . . 73
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.RegisterModel.InputModel . . . 73
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResendEmailConfirmationModel.InputModel . . . 75
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResetPasswordModel.InputModel . . . 75
ZarzadzanieBiblioteka.Models.Ksiazka . . . 76
Migration
  ZarzadzanieBiblioteka.Data.Migrations.CreateIdentitySchema . . . 35
  ZarzadzanieBiblioteka.Data.Migrations.v1 . . . 124
  ZarzadzanieBiblioteka.Data.Migrations.v2 . . . 124
  ZarzadzanieBiblioteka.Data.Migrations.v3 . . . 125
  ZarzadzanieBiblioteka.Data.Migrations.v4 . . . 126
  ZarzadzanieBiblioteka.Data.Migrations.v5 . . . 127

ZarzadzanieBiblioteka.Data.Migrations.v6 128
ZarzadzanieBiblioteka.Data.Migrations.v7 129
ZarzadzanieBiblioteka.Data.Migrations.v8 129
ModelSnapshot
ZarzadzanieBiblioteka.Data.Migrations.ApplicationDbContextModelSnapshot 22
ZarzadzanieBiblioteka.Models.Opinia 100
PageModel
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel 25
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.AccessDeniedModel 19
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ConfirmEmailChangeModel 31
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ConfirmEmailModel 32
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ExternalLoginModel 49
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ForgotPasswordConfirmation 55
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ForgotPasswordModel 56
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LockoutModel 91
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginModel 93
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginWith2faModel 95
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginWithRecoveryCodeModel 97
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LogoutModel 99
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ChangePasswordModel 29
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.DeletePersonalDataModel 36
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Disable2faModel 38
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.DownloadPersonalDataModel 40
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EmailModel 41
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EnableAuthenticatorModel 45
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ExternalLoginsModel 52
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.GenerateRecoveryCodesModel . . . 57
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.IndexModel 63
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.PersonalDataModel 102
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ResetAuthenticatorModel 109
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.SetPasswordModel 115
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ShowRecoveryCodesModel 117
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.TwoFactorAuthenticationModel 119
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.RegisterConfirmationModel 103
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.RegisterModel 105
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResendEmailConfirmationModel 107
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResetPasswordConfirmationModel 111
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResetPasswordModel 112
ZarzadzanieBiblioteka.Areas.Identity.Pages.ErrorModel 47
ZarzadzanieBiblioteka.Models.Rezerwacja 114
ZarzadzanieBiblioteka.Models.Wolumin 130
ZarzadzanieBiblioteka.Models.Wypozyczenie 131

Chapter 4

Class Index

4.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.AccessDeniedModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 19
ZarzadzanieBiblioteka.Data.ApplicationDbContext 20
ZarzadzanieBiblioteka.Data.Migrations.ApplicationDbContextModelSnapshot 22
ZarzadzanieBiblioteka.Models.Autor
Represents an author in the library system 23
ZarzadzanieBiblioteka.Controllers.BaseController
Base controller class that other controllers inherit from 24
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel 25
ZarzadzanieBiblioteka.Models.Biblioteka
Represents a library in the library management system 27
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ChangePasswordModel 29
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ConfirmEmailChangeModel 31
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ConfirmEmailModel 32
ZarzadzanieBiblioteka.Controllers.ContactController
Controller for managing email sending. Provides functionality for sending emails by using forms 34
ZarzadzanieBiblioteka.Data.Migrations.CreateIdentitySchema 35
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.DeletePersonalDataModel 36
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Disable2faModel 38
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.DownloadPersonalDataModel 40
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EmailModel 41
ZarzadzanieBiblioteka.Models.EmailService
Provides email sending functionality for the library management system 43
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EnableAuthenticatorModel 45
ZarzadzanieBiblioteka.Areas.Identity.Pages.ErrorModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 47
ZarzadzanieBiblioteka.Models.ErrorViewModel
Represents an error view model in the library management system 48
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ExternalLoginModel 49
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ExternalLoginsModel 52
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ForgotPasswordConfirmation
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 55

ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ForgotPasswordModel 56
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.GenerateRecoveryCodesModel 57
ZarzadzanieBiblioteka.Controllers.HomeController
Controller responsible for handling home-related actions 59
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.IndexModel 63
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ExternalLoginModel.InputModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 65
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ForgotPasswordModel.InputModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 65
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginModel.InputModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 66
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginWith2faModel.InputModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 67
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginWithRecoveryCodeModel.InputModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 68
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ChangePasswordModel.InputModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 69
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.DeletePersonalDataModel.InputModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 70
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EmailModel.InputModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 71
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EnableAuthenticatorModel.InputModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 71
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.IndexModel.InputModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 72
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.SetPasswordModel.InputModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 73
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.RegisterModel.InputModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 73
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResendEmailConfirmationModel.InputModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 75
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResetPasswordModel.InputModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 75
ZarzadzanieBiblioteka.Models.Ksiazka
Represents a book in the library management system 76
ZarzadzanieBiblioteka.Controllers.LibraryController
Controller for managing the library system. Provides functionality for books, authors, reviews, reservations, and loans 79
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LockoutModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 91
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginModel 93
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginWith2faModel 95
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginWithRecoveryCodeModel 97

ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LogoutModel 99
ZarzadzanieBiblioteka.Models.Opinia
Represents a review in the library management system 100
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.PersonalDataModel 102
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.RegisterConfirmationModel 103
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.RegisterModel 105
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResendEmailConfirmationModel 107
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ResetAuthenticatorModel 109
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResetPasswordConfirmationModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 111
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResetPasswordModel 112
ZarzadzanieBiblioteka.Models.Rezerwacja
Represents a reservation in the library management system 114
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.SetPasswordModel 115
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ShowRecoveryCodesModel
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases 117
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.TwoFactorAuthenticationModel 119
ZarzadzanieBiblioteka.Models.Uzytkownik
Represents a user in the library management system 122
ZarzadzanieBiblioteka.Data.Migrations.v1
124
ZarzadzanieBiblioteka.Data.Migrations.v2
124
ZarzadzanieBiblioteka.Data.Migrations.v3
125
ZarzadzanieBiblioteka.Data.Migrations.v4
126
ZarzadzanieBiblioteka.Data.Migrations.v5
127
ZarzadzanieBiblioteka.Data.Migrations.v6
128
ZarzadzanieBiblioteka.Data.Migrations.v7
129
ZarzadzanieBiblioteka.Data.Migrations.v8
129
ZarzadzanieBiblioteka.Models.Wolumin
Represents a volume in the library management system 130
ZarzadzanieBiblioteka.Models.Wypozyczenie
Represents a borrowing in the library management system 131

Chapter 5

File Index

5.1 File List

Here is a list of all files with brief descriptions:

6.4 ZarzadzanieBiblioteka.Areas.Identity.Pages Namespace Reference

Namespaces

- namespace Account

Classes

- class ErrorModel

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

6.5 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account Namespace Reference

Namespaces

- namespace Manage

Classes

- class AccessDeniedModel

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- class ConfirmEmailChangeModel
- class ConfirmEmailModel
- class ExternalLoginModel
- class ForgotPasswordConfirmation

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- class ForgotPasswordModel
- class LockoutModel

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- class LoginModel
- class LoginWith2faModel
- class LoginWithRecoveryCodeModel
- class LogoutModel
- class RegisterConfirmationModel
- class RegisterModel
- class ResendEmailConfirmationModel
- class ResetPasswordConfirmationModel

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- class ResetPasswordModel

6.6 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage Namespace Reference

Classes

- class BasePageModel
- class ChangePasswordModel
- class DeletePersonalDataModel
- class Disable2faModel
- class DownloadPersonalDataModel
- class EmailModel
- class EnableAuthenticatorModel
- class ExternalLoginsModel
- class GenerateRecoveryCodesModel
- class IndexModel
- class **ManageNavPages**

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

- class PersonalDataModel
- class ResetAuthenticatorModel
- class SetPasswordModel
- class ShowRecoveryCodesModel

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- class TwoFactorAuthenticationModel

6.7 ZarzadzanieBiblioteka.Controllers Namespace Reference

Classes

- class BaseController

  Base controller class that other controllers inherit from.
- class ContactController

  Controller for managing email sending. Provides functionality for sending emails by using forms.
- class HomeController

  Controller responsible for handling home-related actions.
- class LibraryController

  Controller for managing the library system. Provides functionality for books, authors, reviews, reservations, and loans.

6.8 ZarzadzanieBiblioteka.Data Namespace Reference

Namespaces

- namespace Migrations

Classes

- class ApplicationDbContext

6.9 ZarzadzanieBiblioteka.Data.Migrations Namespace Reference

Classes

- class ApplicationDbContextModelSnapshot
- class CreateIdentitySchema
- class v1
- class v2
- class v3
- class v4
- class v5
- class v6
- class v7
- class v8

6.10 ZarzadzanieBiblioteka.Models Namespace Reference

Classes

- class Autor

  Represents an author in the library system.
- class Biblioteka

  Represents a library in the library management system.
- class EmailService

  Provides email sending functionality for the library management system.
- class ErrorViewModel

  Represents an error view model in the library management system.
- class Ksiazka

  Represents a book in the library management system.
- class Opinia

  Represents a review in the library management system.
- class Rezerwacja

  Represents a reservation in the library management system.
- class Uzytkownik

  Represents a user in the library management system.
- class Wolumin

  Represents a volume in the library management system.
- class Wypozyczenie

  Represents a borrowing in the library management system.

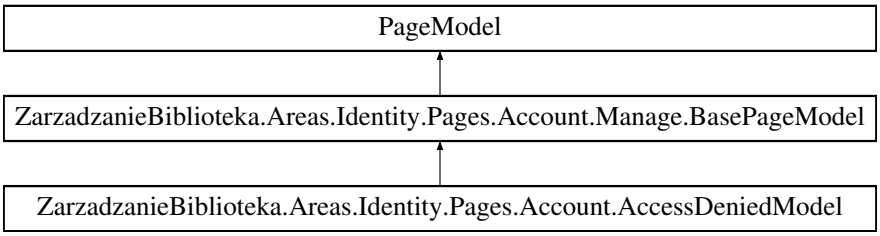
Chapter 7

Class Documentation

7.1 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.AccessDenied↩ Model Class Reference

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Inheritance diagram for ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.AccessDeniedModel:



Public Member Functions

- AccessDeniedModel (ApplicationDbContext dbContext)
- void OnGet ()

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Public Member Functions inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- BasePageModel (ApplicationDbContext dbContext)
- override void OnPageHandlerExecuting (PageHandlerExecutingContext context)

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- readonly ApplicationDbContext dbContext

7.1.1 Detailed Description

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.1.2 Constructor & Destructor Documentation

7.1.2.1 AccessDeniedModel()

```
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.AccessDeniedModel.AccessDeniedModel (
            ApplicationDbContext dbContext)
```

7.1.3 Member Function Documentation

7.1.3.1 OnGet()

```
void ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.AccessDeniedModel.OnGet ()
```

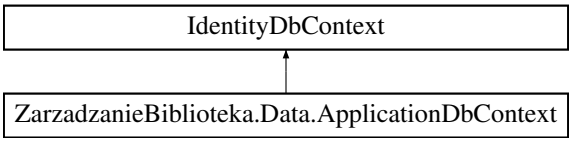
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/AccessDenied.cshtm

7.2 ZarzadzanieBiblioteka.Data.ApplicationDbContext Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Data.ApplicationDbContext:



Public Member Functions

- ApplicationDbContext (DbContextOptions< ApplicationDbContext > options)

Protected Member Functions

- override void OnModelCreating (ModelBuilder builder)
- override void OnConfiguring (DbContextOptionsBuilder optionsBuilder)

Properties

- virtual DbSet< Uzytkownik > Uzytkownicy [get, set]
- virtual DbSet< Autor > Autorzy [get, set]
- virtual DbSet< Biblioteka > Biblioteki [get, set]
- virtual DbSet< Ksiazka > Ksiazki [get, set]
- virtual DbSet< Opinia > Opinie [get, set]
- virtual DbSet< Wypozyczenie > Wypozyczenia [get, set]
- virtual DbSet< Rezerwacja > Rezerwacje [get, set]
- virtual DbSet< Wolumin > Woluminy [get, set]

7.2.1 Constructor & Destructor Documentation

7.2.1.1 ApplicationDbContext()

```
ZarzadzanieBiblioteka.Data.ApplicationDbContext.ApplicationDbContext (
            DbContextOptions< ApplicationDbContext > options)
```

7.2.2 Member Function Documentation

7.2.2.1 OnConfiguring()

```
override void ZarzadzanieBiblioteka.Data.ApplicationDbContext.OnConfiguring (
            DbContextOptionsBuilder optionsBuilder) [protected]
```

7.2.2.2 OnModelCreating()

```
override void ZarzadzanieBiblioteka.Data.ApplicationDbContext.OnModelCreating (
            ModelBuilder builder) [protected]
```

7.2.3 Property Documentation

7.2.3.1 Autorzy

```
virtual DbSet<Autor> ZarzadzanieBiblioteka.Data.ApplicationDbContext.Autorzy [get], [set]
```

7.2.3.2 Biblioteki

```
virtual DbSet<Biblioteka> ZarzadzanieBiblioteka.Data.ApplicationDbContext.Biblioteki [get],
[set]
```

7.2.3.3 Ksiazki

```
virtual DbSet<Ksiazka> ZarzadzanieBiblioteka.Data.ApplicationDbContext.Ksiazki [get], [set]
```

7.2.3.4 Opinie

```
virtual DbSet<Opinia> ZarzadzanieBiblioteka.Data.ApplicationDbContext.Opinie  [get], [set]
```

7.2.3.5 Rezerwacje

```
virtual DbSet<Rezerwacja> ZarzadzanieBiblioteka.Data.ApplicationDbContext.Rezerwacje  [get],
[set]
```

7.2.3.6 Uzytkownicy

```
virtual DbSet<Uzytkownik> ZarzadzanieBiblioteka.Data.ApplicationDbContext.Uzytkownicy  [get],
[set]
```

7.2.3.7 Woluminy

```
virtual DbSet<Wolumin> ZarzadzanieBiblioteka.Data.ApplicationDbContext.Woluminy  [get], [set]
```

7.2.3.8 Wypozyczenia

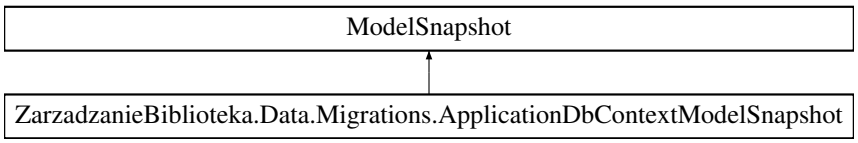
```
virtual DbSet<Wypozyczenie> ZarzadzanieBiblioteka.Data.ApplicationDbContext.Wypozyczenia
[get], [set]
```

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Data/ApplicationDbContext.cs

7.3 ZarzadzanieBiblioteka.Data.Migrations.ApplicationDbContextModelSnapshot Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Data.Migrations.ApplicationDbContextModelSnapshot:



Protected Member Functions

- override void BuildModel (ModelBuilder modelBuilder)

7.3.1 Member Function Documentation

7.3.1.1 BuildModel()

```
override void ZarzadzanieBiblioteka.Data.Migrations.ApplicationDbContextModelSnapshot.Build↩
Model (
            ModelBuilder modelBuilder)  [protected]
```

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Data/Migrations/ApplicationDbContextModelSnapsh

7.4 ZarzadzanieBiblioteka.Models.Autor Class Reference

Represents an author in the library system.

Properties

- int Id [get, set]
  Gets or sets the unique identifier for the author.
- string Imie = string.Empty [get, set]
  Gets or sets the first name of the author.
- string Nazwisko = string.Empty [get, set]
  Gets or sets the last name of the author.
- virtual ICollection< Ksiazka > Ksiazki = new List<Ksiazka>() [get, set]
  Gets or sets the collection of books written by the author.

7.4.1 Detailed Description

Represents an author in the library system.

7.4.2 Property Documentation

7.4.2.1 Id

```
int ZarzadzanieBiblioteka.Models.Autor.Id  [get], [set]
```

Gets or sets the unique identifier for the author.

7.4.2.2 Imie

```
string ZarzadzanieBiblioteka.Models.Autor.Imie = string.Empty  [get], [set]
```

Gets or sets the first name of the author.

7.4.2.3 Ksiazki

```
virtual ICollection<Ksiazka> ZarzadzanieBiblioteka.Models.Autor.Ksiazki = new List<Ksiazka>()
[get], [set]
```

Gets or sets the collection of books written by the author.

7.4.2.4 Nazwisko

```
string ZarzadzanieBiblioteka.Models.Autor.Nazwisko = string.Empty  [get], [set]
```

Gets or sets the last name of the author.

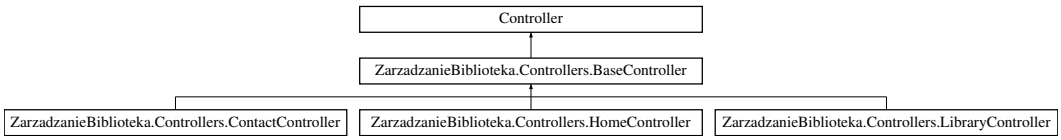
The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Models/Autor.cs

7.5 ZarzadzanieBiblioteka.Controllers.BaseController Class Reference

Base controller class that other controllers inherit from.

Inheritance diagram for ZarzadzanieBiblioteka.Controllers.BaseController:



Public Member Functions

- BaseController (ApplicationDbContext dbContext)

  Initializes a new instance of the BaseController class.
- override void OnActionExecuting (ActionExecutingContext context)

  Executes before an action method is called. Retrieves book genres for use in a dropdown menu.

Protected Attributes

- readonly ApplicationDbContext _dbContext

7.5.1 Detailed Description

Base controller class that other controllers inherit from.

7.5.2 Constructor & Destructor Documentation

7.5.2.1 BaseController()

```
ZarzadzanieBiblioteka.Controllers.BaseController.BaseController (
            ApplicationDbContext dbContext)
```

Initializes a new instance of the BaseController class.

Parameters

dbContext	The database context instance.

7.5.3 Member Function Documentation

7.5.3.1 OnActionExecuting()

```
override void ZarzadzanieBiblioteka.Controllers.BaseController.OnActionExecuting (
            ActionExecutingContext context)
```

Executes before an action method is called. Retrieves book genres for use in a dropdown menu.

Parameters

context	The action executing context.

7.5.4 Member Data Documentation

7.5.4.1 _dbContext

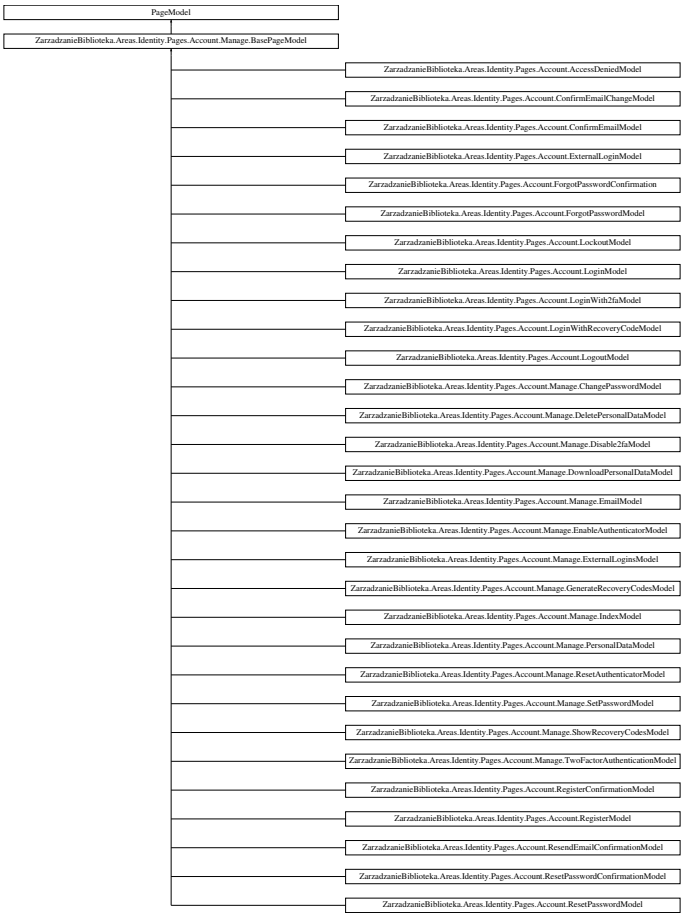
```
readonly ApplicationDbContext ZarzadzanieBiblioteka.Controllers.BaseController._dbContext
[protected]
```

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Controllers/BaseController.cs

7.6 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel:



Public Member Functions

- BasePageModel (ApplicationDbContext dbContext)
- override void OnPageHandlerExecuting (PageHandlerExecutingContext context)

Protected Attributes

- readonly ApplicationDbContext dbContext

7.6.1 Constructor & Destructor Documentation

7.6.1.1 BasePageModel()

```
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel.BasePageModel (
            ApplicationDbContext dbContext)
```

7.6.2 Member Function Documentation

7.6.2.1 OnPageHandlerExecuting()

```
override void ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel.OnPage↩
HandlerExecuting (
            PageHandlerExecutingContext context)
```

7.6.3 Member Data Documentation

7.6.3.1 dbContext

```
readonly ApplicationDbContext ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Base↩
PageModel.dbContext  [protected]
```

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/↩ Manage/BasePageModel.cs

7.7 ZarzadzanieBiblioteka.Models.Biblioteka Class Reference

Represents a library in the library management system.

Properties

- int Id `[get, set]`
  Gets or sets the unique identifier for the library.
- string Nazwa = string.Empty `[get, set]`
  Gets or sets the name of the library.
- string Miejscowosc = string.Empty `[get, set]`
  Gets or sets the city where the library is located.
- string Ulica = string.Empty `[get, set]`
  Gets or sets the street where the library is located.
- string NumerBudynku = string.Empty `[get, set]`
  Gets or sets the building number of the library.
- string KodPocztowy = string.Empty `[get, set]`
  Gets or sets the postal code of the library.
- virtual ICollection< Ksiazka > Ksiazki = new List<Ksiazka>() `[get, set]`
  Gets or sets the collection of books available in the library.

7.7.1 Detailed Description

Represents a library in the library management system.

7.7.2 Property Documentation

7.7.2.1 Id

```
int ZarzadzanieBiblioteka.Models.Biblioteka.Id  [get], [set]
```

Gets or sets the unique identifier for the library.

7.7.2.2 KodPocztowy

```
string ZarzadzanieBiblioteka.Models.Biblioteka.KodPocztowy = string.Empty  [get], [set]
```

Gets or sets the postal code of the library.

7.7.2.3 Ksiazki

```
virtual ICollection<Ksiazka> ZarzadzanieBiblioteka.Models.Biblioteka.Ksiazki = new List<Ksiazka>()
[get], [set]
```

Gets or sets the collection of books available in the library.

7.7.2.4 Miejscowosc

```
string ZarzadzanieBiblioteka.Models.Biblioteka.Miejscowosc = string.Empty  [get], [set]
```

Gets or sets the city where the library is located.

7.7.2.5 Nazwa

```
string ZarzadzanieBiblioteka.Models.Biblioteka.Nazwa = string.Empty  [get], [set]
```

Gets or sets the name of the library.

7.7.2.6 NumerBudynku

```
string ZarzadzanieBiblioteka.Models.Biblioteka.NumerBudynku = string.Empty  [get], [set]
```

Gets or sets the building number of the library.

7.7.2.7 Ulica

```
string ZarzadzanieBiblioteka.Models.Biblioteka.Ulica = string.Empty  [get], [set]
```

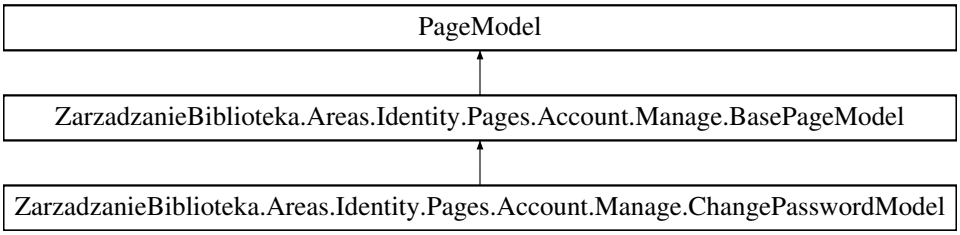
Gets or sets the street where the library is located.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Models/Biblioteka.cs

7.8 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.↩ ChangePasswordModel Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ChangePasswordModel:



Classes

- class InputModel

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Public Member Functions

- ChangePasswordModel (ApplicationDbContext dbContext, UserManager< Uzytkownik > userManager, SignInManager< Uzytkownik > signInManager, ILogger< ChangePasswordModel > logger)
- async Task< IActionResult > OnGetAsync ()
- async Task< IActionResult > OnPostAsync ()

Public Member Functions inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- BasePageModel (ApplicationDbContext dbContext)
- override void OnPageHandlerExecuting (PageHandlerExecutingContext context)

Properties

- InputModel Input `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string StatusMessage `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- readonly ApplicationDbContext dbContext

7.8.1 Constructor & Destructor Documentation

7.8.1.1 ChangePasswordModel()

```
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ChangePasswordModel.ChangePassword↩
Model (
            ApplicationDbContext dbContext,
            UserManager< Uzytkownik > userManager,
            SignInManager< Uzytkownik > signInManager,
            ILogger< ChangePasswordModel > logger)
```

7.8.2 Member Function Documentation

7.8.2.1 OnGetAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Change↩
PasswordModel.OnGetAsync ()
```

7.8.2.2 OnPostAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Change↩
PasswordModel.OnPostAsync ()
```

7.8.3 Property Documentation

7.8.3.1 Input

```
InputModel ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ChangePasswordModel.Input
[get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.8.3.2 StatusMessage

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ChangePasswordModel.Status↩
Message  [get], [set]
```

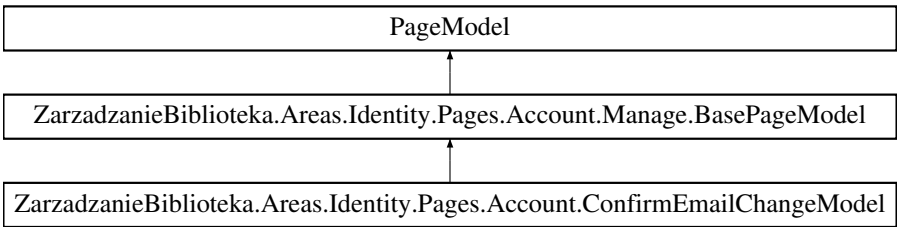
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/↩ Manage/ChangePassword.cshtml.cs

7.9 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ConfirmEmail↩ ChangeModel Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ConfirmEmailChangeModel:



Public Member Functions

- ConfirmEmailChangeModel (ApplicationDbContext dbContext, UserManager< Uzytkownik > userManager, SignInManager< Uzytkownik > signInManager)
- async Task< IActionResult > OnGetAsync (string userId, string email, string code)

Public Member Functions inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- BasePageModel (ApplicationDbContext dbContext)
- override void OnPageHandlerExecuting (PageHandlerExecutingContext context)

Properties

- string StatusMessage `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- readonly ApplicationDbContext dbContext

7.9.1 Constructor & Destructor Documentation

7.9.1.1 ConfirmEmailChangeModel()

```
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ConfirmEmailChangeModel.ConfirmEmail↩
ChangeModel (
            ApplicationDbContext dbContext,
            UserManager< Uzytkownik > userManager,
            SignInManager< Uzytkownik > signInManager)
```

7.9.2 Member Function Documentation

7.9.2.1 OnGetAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ConfirmEmail↩
ChangeModel.OnGetAsync (
            string userId,
            string email,
            string code)
```

7.9.3 Property Documentation

7.9.3.1 StatusMessage

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ConfirmEmailChangeModel.Status↩
Message  [get], [set]
```

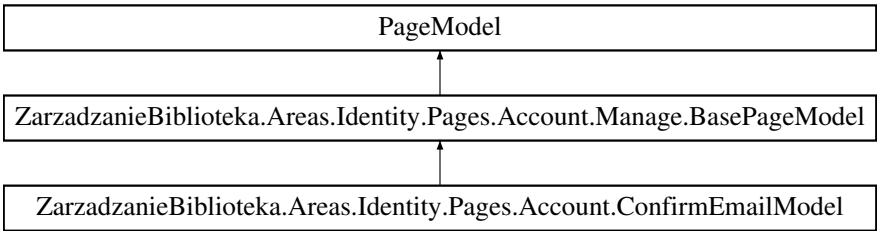
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/ConfirmEmailChange

7.10 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Confirm↩ EmailModel Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ConfirmEmailModel:



Public Member Functions

- ConfirmEmailModel (ApplicationDbContext dbContext, UserManager< Uzytkownik > userManager)
- async Task< IActionResult > OnGetAsync (string userId, string code)

Public Member Functions inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- BasePageModel (ApplicationDbContext dbContext)
- override void OnPageHandlerExecuting (PageHandlerExecutingContext context)

Properties

- string StatusMessage [get, set]

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- readonly ApplicationDbContext dbContext

7.10.1 Constructor & Destructor Documentation

7.10.1.1 ConfirmEmailModel()

```
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ConfirmEmailModel.ConfirmEmailModel (
            ApplicationDbContext dbContext,
            UserManager< Uzytkownik > userManager)
```

7.10.2 Member Function Documentation

7.10.2.1 OnGetAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ConfirmEmail↩
Model.OnGetAsync (
            string userId,
            string code)
```

7.10.3 Property Documentation

7.10.3.1 StatusMessage

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ConfirmEmailModel.StatusMessage
[get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

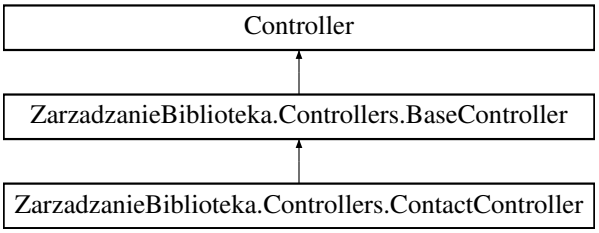
The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/ConfirmEmail.cshtml

7.11 ZarzadzanieBiblioteka.Controllers.ContactController Class Reference

Controller for managing email sending. Provides functionality for sending emails by using forms.

Inheritance diagram for ZarzadzanieBiblioteka.Controllers.ContactController:



Public Member Functions

- ContactController (ApplicationDbContext dbContext, EmailService emailService)
- IActionResult Index ()

  Returns view Index.cshtml.
- async Task< IActionResult > Send (string subject, string message)

  The action responsible for calling the SendEmailAsync method, which sends an email with the content entered by the user.

Public Member Functions inherited from ZarzadzanieBiblioteka.Controllers.BaseController

- BaseController (ApplicationDbContext dbContext)

  Initializes a new instance of the BaseController class.
- override void OnActionExecuting (ActionExecutingContext context)

  Executes before an action method is called. Retrieves book genres for use in a dropdown menu.

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Controllers.BaseController

- readonly ApplicationDbContext _dbContext

7.11.1 Detailed Description

Controller for managing email sending. Provides functionality for sending emails by using forms.

7.11.2 Constructor & Destructor Documentation

7.11.2.1 ContactController()

```
ZarzadzanieBiblioteka.Controllers.ContactController.ContactController (
            ApplicationDbContext dbContext,
            EmailService emailService)
```

7.11.3 Member Function Documentation

7.11.3.1 Index()

```
IActionResult ZarzadzanieBiblioteka.Controllers.ContactController.Index ()
```

Returns view Index.cshtml.

7.11.3.2 Send()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Controllers.ContactController.Send (
            string subject,
            string message)
```

The action responsible for calling the SendEmailAsync method, which sends an email with the content entered by the user.

Parameters

subject	Contains the subject of the message
message	Contains the body of the message

Returns

Returns redirection to Index.cshtml

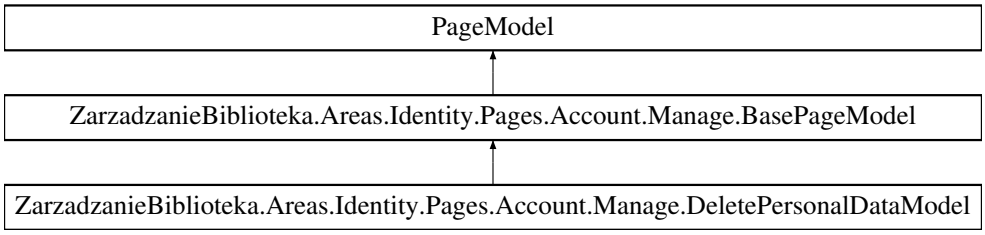
7.13 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.↩ DeletePersonalDataModel Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.DeletePersonalDataModel:



Classes

- class InputModel

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Public Member Functions

- DeletePersonalDataModel (ApplicationDbContext dbContext, UserManager< Uzytkownik > userManager, SignInManager< Uzytkownik > signInManager, ILogger< DeletePersonalDataModel > logger)
- async Task< IActionResult > OnGet ()
- async Task< IActionResult > OnPostAsync ()

Public Member Functions inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- BasePageModel (ApplicationDbContext dbContext)
- override void OnPageHandlerExecuting (PageHandlerExecutingContext context)

Properties

- InputModel Input `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- bool RequirePassword `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- readonly ApplicationDbContext dbContext

7.13.1 Constructor & Destructor Documentation

7.13.1.1 DeletePersonalDataModel()

```
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.DeletePersonalDataModel.Delete↩
PersonalDataModel (
            ApplicationDbContext dbContext,
            UserManager< Uzytkownik > userManager,
            SignInManager< Uzytkownik > signInManager,
            ILogger< DeletePersonalDataModel > logger)
```

7.13.2 Member Function Documentation

7.13.2.1 OnGet()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Delete↩
PersonalDataModel.OnGet ()
```

7.13.2.2 OnPostAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Delete↩
PersonalDataModel.OnPostAsync ()
```

7.13.3 Property Documentation

7.13.3.1 Input

```
InputModel ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.DeletePersonalData↩
Model.Input  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.13.3.2 RequirePassword

```
bool ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.DeletePersonalDataModel.↩
RequirePassword  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

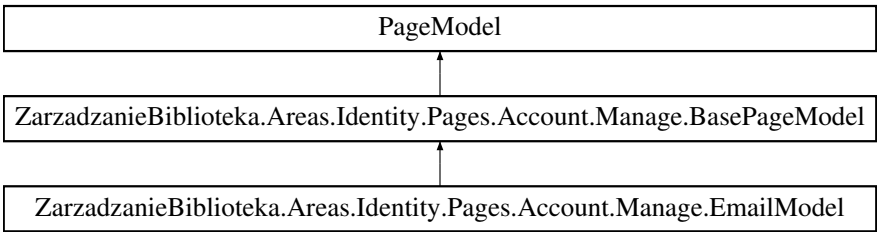
7.16 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.↩ EmailModel Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EmailModel:



Classes

- class InputModel

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Public Member Functions

- EmailModel (ApplicationDbContext dbContext, UserManager< Uzytkownik > userManager, SignIn↩ Manager< Uzytkownik > signInManager, IEmailSender emailSender)
- async Task< IActionResult > OnGetAsync ()
- async Task< IActionResult > OnPostChangeEmailAsync ()
- async Task< IActionResult > OnPostSendVerificationEmailAsync ()

Public Member Functions inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- BasePageModel (ApplicationDbContext dbContext)
- override void OnPageHandlerExecuting (PageHandlerExecutingContext context)

Properties

- string Email `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- bool IsEmailConfirmed `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string StatusMessage `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- InputModel Input `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- readonly ApplicationDbContext dbContext

7.16.1 Constructor & Destructor Documentation

7.16.1.1 EmailModel()

```
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EmailModel.EmailModel (
            ApplicationDbContext dbContext,
            UserManager< Uzytkownik > userManager,
            SignInManager< Uzytkownik > signInManager,
            IEmailSender emailSender)
```

7.16.2 Member Function Documentation

7.16.2.1 OnGetAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Email↩
Model.OnGetAsync ()
```

7.16.2.2 OnPostChangeEmailAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Email↩
Model.OnPostChangeEmailAsync ()
```

7.16.2.3 OnPostSendVerificationEmailAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Email↩
Model.OnPostSendVerificationEmailAsync ()
```

7.16.3 Property Documentation

7.16.3.1 Email

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EmailModel.Email  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.16.3.2 Input

```
InputModel ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EmailModel.Input  [get],
[set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.16.3.3 IsEmailConfirmed

```
bool ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EmailModel.IsEmailConfirmed
[get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.16.3.4 StatusMessage

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EmailModel.StatusMessage
[get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/↩ Manage/Email.cshtml.cs

7.17 ZarzadzanieBiblioteka.Models.EmailService Class Reference

Provides email sending functionality for the library management system.

Public Member Functions

- EmailService (IConfiguration configuration)

  Initializes a new instance of the EmailService class.
- async Task SendEmailAsync (string to, string subject, string message)

  Sends an email asynchronously.

7.17.1 Detailed Description

Provides email sending functionality for the library management system.

7.17.2 Constructor & Destructor Documentation

7.17.2.1 EmailService()

```
ZarzadzanieBiblioteka.Models.EmailService.EmailService (
            IConfiguration configuration)
```

Initializes a new instance of the EmailService class.

Parameters

configuration	The configuration settings for the email service.

7.17.3 Member Function Documentation

7.17.3.1 SendEmailAsync()

```
async Task ZarzadzanieBiblioteka.Models.EmailService.SendEmailAsync (
            string to,
            string subject,
            string message)
```

Sends an email asynchronously.

Parameters

to	The recipient's email address.
subject	The subject of the email.
message	The body of the email.

Returns

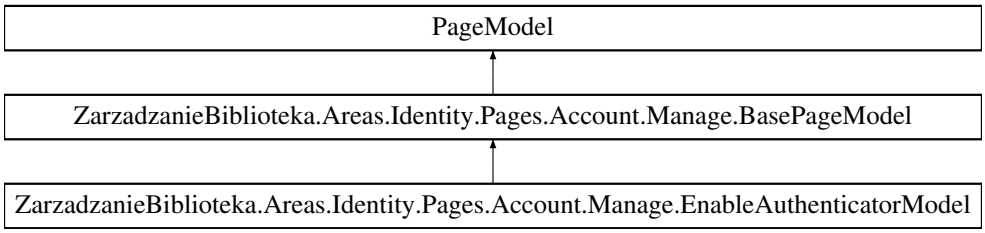
A task that represents the asynchronous operation.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Models/EmailService.cs

7.18 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.↩ EnableAuthenticatorModel Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EnableAuthenticatorModel:



Classes

- class InputModel

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Public Member Functions

- EnableAuthenticatorModel (ApplicationDbContext dbContext, UserManager< Uzytkownik > userManager, ILogger< EnableAuthenticatorModel > logger, UrlEncoder urlEncoder)
- async Task< IActionResult > OnGetAsync ()
- async Task< IActionResult > OnPostAsync ()

Public Member Functions inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- BasePageModel (ApplicationDbContext dbContext)
- override void OnPageHandlerExecuting (PageHandlerExecutingContext context)

Properties

- string SharedKey `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string AuthenticatorUri `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string[] RecoveryCodes `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string StatusMessage `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- InputModel Input `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- readonly ApplicationDbContext dbContext

7.18.1 Constructor & Destructor Documentation

7.18.1.1 EnableAuthenticatorModel()

```
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EnableAuthenticatorModel.Enable↩
AuthenticatorModel (
            ApplicationDbContext dbContext,
            UserManager< Uzytkownik > userManager,
            ILogger< EnableAuthenticatorModel > logger,
            UrlEncoder urlEncoder)
```

7.18.2 Member Function Documentation

7.18.2.1 OnGetAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Enable↩
AuthenticatorModel.OnGetAsync ()
```

7.18.2.2 OnPostAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Enable↩
AuthenticatorModel.OnPostAsync ()
```

7.18.3 Property Documentation

7.18.3.1 AuthenticatorUri

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EnableAuthenticatorModel.↩
AuthenticatorUri  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.18.3.2 Input

```
InputModel ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EnableAuthenticator↩
Model.Input  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.18.3.3 RecoveryCodes

```
string [] ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EnableAuthenticator↩
Model.RecoveryCodes  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.18.3.4 SharedKey

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EnableAuthenticatorModel.↩
SharedKey  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.18.3.5 StatusMessage

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EnableAuthenticatorModel.↩
StatusMessage  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

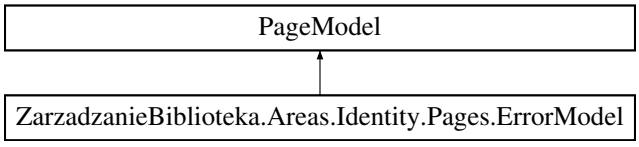
The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/↩ Manage/EnableAuthenticator.cshtml.cs

7.19 ZarzadzanieBiblioteka.Areas.Identity.Pages.ErrorModel Class Reference

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Inheritance diagram for ZarzadzanieBiblioteka.Areas.Identity.Pages.ErrorModel:



Public Member Functions

- void OnGet ()

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Properties

- string RequestId `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- bool ShowRequestId `[get]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.19.1 Detailed Description

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.19.2 Member Function Documentation

7.19.2.1 OnGet()

```
void ZarzadzanieBiblioteka.Areas.Identity.Pages.ErrorModel.OnGet ()
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.19.3 Property Documentation

7.19.3.1 RequestId

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.ErrorModel.RequestId  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.19.3.2 ShowRequestId

```
bool ZarzadzanieBiblioteka.Areas.Identity.Pages.ErrorModel.ShowRequestId  [get]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Error.cshtml.cs

7.20 ZarzadzanieBiblioteka.Models.ErrorViewModel Class Reference

Represents an error view model in the library management system.

Properties

- string? RequestId `[get, set]`

  Gets or sets the request identifier.
- bool ShowRequestId `[get]`

  Gets a value indicating whether the request identifier should be shown.

7.20.1 Detailed Description

Represents an error view model in the library management system.

7.20.2 Property Documentation

7.20.2.1 RequestId

```
string?  ZarzadzanieBiblioteka.Models.ErrorViewModel.RequestId  [get], [set]
```

Gets or sets the request identifier.

7.20.2.2 ShowRequestId

```
bool ZarzadzanieBiblioteka.Models.ErrorViewModel.ShowRequestId  [get]
```

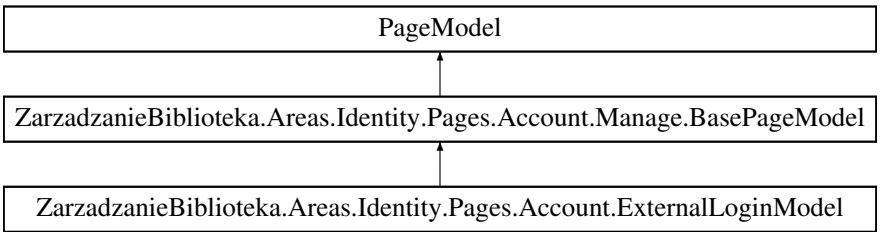
Gets a value indicating whether the request identifier should be shown.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Models/ErrorViewModel.cs

7.21 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.External↩ LoginModel Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ExternalLoginModel:



Classes

- class InputModel

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Public Member Functions

- ExternalLoginModel (ApplicationDbContext dbContext, SignInManager< Uzytkownik > signInManager, UserManager< Uzytkownik > userManager, IUserStore< Uzytkownik > userStore, ILogger< ExternalLoginModel > logger, IEmailSender emailSender)
- IActionResult OnGet ()
- IActionResult OnPost (string provider, string returnUrl=null)
- async Task< IActionResult > OnGetCallbackAsync (string returnUrl=null, string remoteError=null)
- async Task< IActionResult > OnPostConfirmationAsync (string returnUrl=null)

Public Member Functions inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- BasePageModel (ApplicationDbContext dbContext)
- override void OnPageHandlerExecuting (PageHandlerExecutingContext context)

Properties

- InputModel Input `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string ProviderDisplayName `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string ReturnUrl `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string ErrorMessage `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- readonly ApplicationDbContext dbContext

7.21.1 Constructor & Destructor Documentation

7.21.1.1 ExternalLoginModel()

```
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ExternalLoginModel.ExternalLoginModel (
            ApplicationDbContext dbContext,
            SignInManager< Uzytkownik > signInManager,
            UserManager< Uzytkownik > userManager,
            IUserStore< Uzytkownik > userStore,
            ILogger< ExternalLoginModel > logger,
            IEmailSender emailSender)
```

7.21.2 Member Function Documentation

7.21.2.1 OnGet()

```
IActionResult ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ExternalLoginModel.OnGet ()
```

7.21.2.2 OnGetCallbackAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ExternalLogin↩
Model.OnGetCallbackAsync (
            string returnUrl = null,
            string remoteError = null)
```

7.21.2.3 OnPost()

```
IActionResult ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ExternalLoginModel.OnPost (
            string provider,
            string returnUrl = null)
```

7.21.2.4 OnPostConfirmationAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ExternalLogin↩
Model.OnPostConfirmationAsync (
            string returnUrl = null)
```

7.21.3 Property Documentation

7.21.3.1 ErrorMessage

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ExternalLoginModel.ErrorMessage
[get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.21.3.2 Input

```
InputModel ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ExternalLoginModel.Input  [get],
[set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.21.3.3 ProviderDisplayName

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ExternalLoginModel.ProviderDisplay↩
Name  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.21.3.4 ReturnUrl

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ExternalLoginModel.ReturnUrl  [get],
[set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

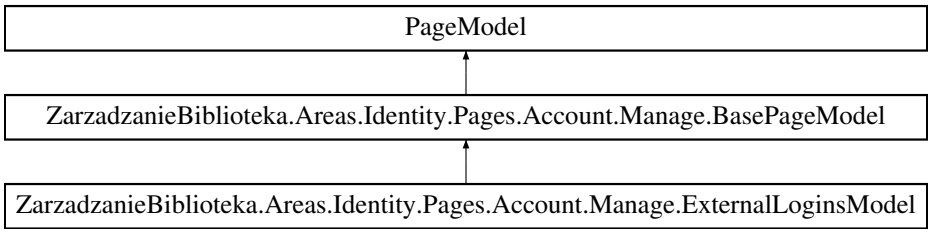
Inheritance diagram for ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ExternalLoginsModel:



Public Member Functions

- ExternalLoginsModel (ApplicationDbContext dbContext, UserManager< Uzytkownik > userManager, Sign↩ InManager< Uzytkownik > signInManager, IUserStore< Uzytkownik > userStore)
- async Task< IActionResult > OnGetAsync ()
- async Task< IActionResult > OnPostRemoveLoginAsync (string loginProvider, string providerKey)
- async Task< IActionResult > OnPostLinkLoginAsync (string provider)
- async Task< IActionResult > OnGetLinkLoginCallbackAsync ()

Public Member Functions inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- BasePageModel (ApplicationDbContext dbContext)
- override void OnPageHandlerExecuting (PageHandlerExecutingContext context)

Properties

- IList< UserLoginInfo > CurrentLogins `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- IList< AuthenticationScheme > OtherLogins `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- bool ShowRemoveButton `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string StatusMessage `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- readonly ApplicationDbContext dbContext

7.22.1 Constructor & Destructor Documentation

7.22.1.1 ExternalLoginsModel()

```
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ExternalLoginsModel.ExternalLogins↩
Model (
            ApplicationDbContext dbContext,
            UserManager< Uzytkownik > userManager,
            SignInManager< Uzytkownik > signInManager,
            IUserStore< Uzytkownik > userStore)
```

7.22.2 Member Function Documentation

7.22.2.1 OnGetAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.External↩
LoginsModel.OnGetAsync ()
```

7.22.2.2 OnGetLinkLoginCallbackAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.External↩
LoginsModel.OnGetLinkLoginCallbackAsync ()
```

7.22.2.3 OnPostLinkLoginAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.External↩
LoginsModel.OnPostLinkLoginAsync (
            string provider)
```

7.22.2.4 OnPostRemoveLoginAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.External↩
LoginsModel.OnPostRemoveLoginAsync (
            string loginProvider,
            string providerKey)
```

7.22.3 Property Documentation

7.22.3.1 CurrentLogins

```
IList<UserLoginInfo> ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.External↩
LoginsModel.CurrentLogins  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.22.3.2 OtherLogins

```
IList<AuthenticationScheme> ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.External↩
LoginsModel.OtherLogins  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.22.3.3 ShowRemoveButton

```
bool ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ExternalLoginsModel.Show↩
RemoveButton  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.22.3.4 StatusMessage

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.ExternalLoginsModel.Status↩
Message  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

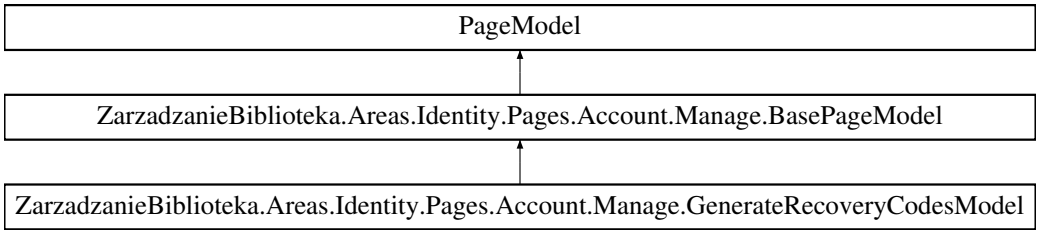
7.25 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.↩ GenerateRecoveryCodesModel Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.GenerateRecoveryCodes↩ Model:



Public Member Functions

- GenerateRecoveryCodesModel (ApplicationDbContext dbContext, UserManager< Uzytkownik > user↩ Manager, ILogger< GenerateRecoveryCodesModel > logger)
- async Task< IActionResult > OnGetAsync ()
- async Task< IActionResult > OnPostAsync ()

Public Member Functions inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- BasePageModel (ApplicationDbContext dbContext)
- override void OnPageHandlerExecuting (PageHandlerExecutingContext context)

Properties

- string[] RecoveryCodes `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string StatusMessage `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- readonly ApplicationDbContext dbContext

7.25.1 Constructor & Destructor Documentation

7.25.1.1 GenerateRecoveryCodesModel()

```
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.GenerateRecoveryCodesModel.Generate↩
RecoveryCodesModel (
            ApplicationDbContext dbContext,
            UserManager< Uzytkownik > userManager,
            ILogger< GenerateRecoveryCodesModel > logger)
```

7.25.2 Member Function Documentation

7.25.2.1 OnGetAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Generate↩
RecoveryCodesModel.OnGetAsync ()
```

7.25.2.2 OnPostAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Generate↩
RecoveryCodesModel.OnPostAsync ()
```

7.25.3 Property Documentation

7.25.3.1 RecoveryCodes

```
string [] ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.GenerateRecoveryCodes↩
Model.RecoveryCodes  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.25.3.2 StatusMessage

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.GenerateRecoveryCodesModel.↩
StatusMessage  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

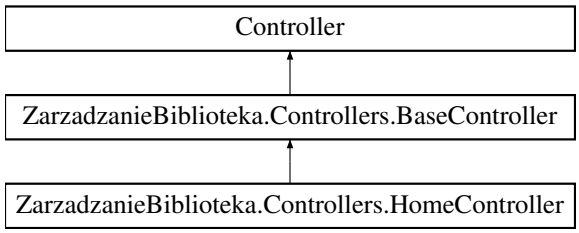
The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/↩ Manage/GenerateRecoveryCodes.cshtml.cs

7.26 ZarzadzanieBiblioteka.Controllers.HomeController Class Reference

Controller responsible for handling home-related actions.

Inheritance diagram for ZarzadzanieBiblioteka.Controllers.HomeController:



Public Member Functions

- HomeController (ILogger< HomeController > logger, ApplicationDbContext dbContext, UserManager< Uzytkownik > userManager)

  Initializes a new instance of the HomeController class.
- IActionResult Index ()

  Displays the home page.
- IActionResult Privacy ()

  Displays the privacy policy page.
- IActionResult ManageUsers ()

  Displays the manage users page.
- IActionResult MakeAdmin (string id)

  Promotes a user to admin.
- IActionResult UnmakeAdmin (string id)

  Demotes an admin to a regular user.
- IActionResult RemoveUser (string id)

  Removes a user from the system.
- IActionResult Error ()

  Displays the error page.

Public Member Functions inherited from ZarzadzanieBiblioteka.Controllers.BaseController

- BaseController (ApplicationDbContext dbContext)

  Initializes a new instance of the BaseController class.
- override void OnActionExecuting (ActionExecutingContext context)

  Executes before an action method is called. Retrieves book genres for use in a dropdown menu.

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Controllers.BaseController

- readonly ApplicationDbContext _dbContext

7.26.1 Detailed Description

Controller responsible for handling home-related actions.

7.26.2 Constructor & Destructor Documentation

7.26.2.1 HomeController()

```
ZarzadzanieBiblioteka.Controllers.HomeController.HomeController (
            ILogger< HomeController > logger,
            ApplicationDbContext dbContext,
            UserManager< Uzytkownik > userManager)
```

Initializes a new instance of the HomeController class.

Parameters

logger	The logger instance.
dbContext	The database context instance.

7.26.3 Member Function Documentation

7.26.3.1 Error()

```
IActionResult ZarzadzanieBiblioteka.Controllers.HomeController.Error ()
```

Displays the error page.

Returns

The error view with the error details.

7.26.3.2 Index()

```
IActionResult ZarzadzanieBiblioteka.Controllers.HomeController.Index ()
```

Displays the home page.

Returns

The home page view.

7.26.3.3 MakeAdmin()

```
IActionResult ZarzadzanieBiblioteka.Controllers.HomeController.MakeAdmin (
            string id)
```

Promotes a user to admin.

Parameters

id	The ID of the user to promote.

Returns

Redirects to the manage users page.

7.26.3.4 ManageUsers()

```
IActionResult ZarzadzanieBiblioteka.Controllers.HomeController.ManageUsers ()
```

Displays the manage users page.

Returns

The manage users view with a list of users.

7.26.3.5 Privacy()

```
IActionResult ZarzadzanieBiblioteka.Controllers.HomeController.Privacy ()
```

Displays the privacy policy page.

Returns

The privacy policy view.

7.26.3.6 RemoveUser()

```
IActionResult ZarzadzanieBiblioteka.Controllers.HomeController.RemoveUser (
            string id)
```

Removes a user from the system.

Parameters

id	The ID of the user to remove.

Returns

Redirects to the manage users page.

7.26.3.7 UnmakeAdmin()

```
IActionResult ZarzadzanieBiblioteka.Controllers.HomeController.UnmakeAdmin (
            string id)
```

Demotes an admin to a regular user.

Parameters

id	The ID of the user to demote.

Returns

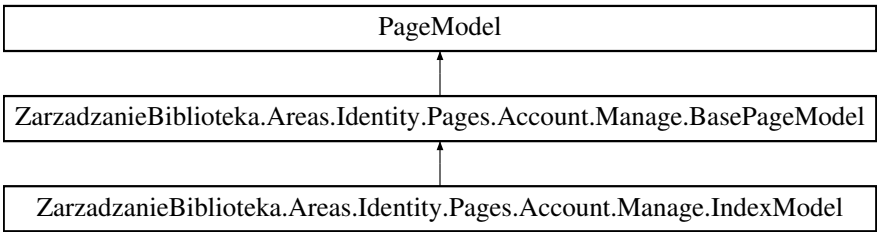
Redirects to the manage users page.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Controllers/HomeController.cs

7.27 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.↩ IndexModel Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.IndexModel:



Classes

- class InputModel

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Public Member Functions

- IndexModel (ApplicationDbContext dbContext, UserManager< Uzytkownik > userManager, SignIn↩ Manager< Uzytkownik > signInManager)
- async Task< IActionResult > OnGetAsync ()
- async Task< IActionResult > OnPostAsync ()

Public Member Functions inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- BasePageModel (ApplicationDbContext dbContext)
- override void OnPageHandlerExecuting (PageHandlerExecutingContext context)

Properties

- string Username `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string StatusMessage `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- InputModel Input `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- readonly ApplicationDbContext dbContext

7.27.1 Constructor & Destructor Documentation

7.27.1.1 IndexModel()

```
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.IndexModel.IndexModel (
            ApplicationDbContext dbContext,
            UserManager< Uzytkownik > userManager,
            SignInManager< Uzytkownik > signInManager)
```

7.27.2 Member Function Documentation

7.27.2.1 OnGetAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Index↩
Model.OnGetAsync ()
```

7.27.2.2 OnPostAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.Index↩
Model.OnPostAsync ()
```

7.27.3 Property Documentation

7.27.3.1 Input

```
InputModel ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.IndexModel.Input  [get],
[set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.27.3.2 StatusMessage

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.IndexModel.StatusMessage
[get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.27.3.3 Username

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.IndexModel.Username  [get],
[set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EmailModel.InputModel.New↩
Email  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/↩ Manage/Email.cshtml.cs

7.36 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.↩ EnableAuthenticatorModel.InputModel Class Reference

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Properties

- string Code `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.36.1 Detailed Description

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.36.2 Property Documentation

7.36.2.1 Code

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.EnableAuthenticatorModel.↩
InputModel.Code  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/↩ Manage/EnableAuthenticator.cshtml.cs

7.37 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.↩ IndexModel.InputModel Class Reference

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Properties

- string PhoneNumber `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.37.1 Detailed Description

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.37.2 Property Documentation

7.37.2.1 PhoneNumber

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.IndexModel.InputModel.Phone↩
Number  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/↩ Manage/Index.cshtml.cs

7.38 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.SetPasswordModel.InputModel Class Reference

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Properties

- string NewPassword `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string ConfirmPassword `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.38.1 Detailed Description

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.38.2 Property Documentation

7.38.2.1 ConfirmPassword

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.SetPasswordModel.Input↩
Model.ConfirmPassword [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.38.2.2 NewPassword

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.SetPasswordModel.Input↩
Model.NewPassword [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/↩
Manage/SetPassword.cshtml.cs

7.39 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Register↩ Model.InputModel Class Reference

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Properties

- string Email [get, set]

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string Password [get, set]

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string ConfirmPassword [get, set]

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.39.1 Detailed Description

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.39.2 Property Documentation

7.39.2.1 ConfirmPassword

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.RegisterModel.InputModel.Confirm↩
Password [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.39.2.2 Email

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.RegisterModel.InputModel.Email [get],
[set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.39.2.3 Password

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.RegisterModel.InputModel.Password
[get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/Register.cshtml.cs

7.40 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResendEmailConfirmationModel.InputModel Class Reference

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Properties

- string Email `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.40.1 Detailed Description

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.40.2 Property Documentation

7.40.2.1 Email

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResendEmailConfirmationModel.InputModel.Email [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/ResendEmailConfirm

7.41 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResetPasswordModel.InputModel Class Reference

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Properties

- string Email `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string Password `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string ConfirmPassword `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string Code `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.41.1 Detailed Description

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.41.2 Property Documentation

7.41.2.1 Code

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResetPasswordModel.InputModel.Code
[get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.41.2.2 ConfirmPassword

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResetPasswordModel.InputModel.↩
ConfirmPassword [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.41.2.3 Email

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResetPasswordModel.InputModel.Email
[get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.41.2.4 Password

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.ResetPasswordModel.InputModel.↩
Password [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/ResetPassword.cshtr

7.42 ZarzadzanieBiblioteka.Models.Ksiazka Class Reference

Represents a book in the library management system.

Properties

- int Id [get, set]
  Gets or sets the unique identifier for the book.
- string Tytul = string.Empty [get, set]
  Gets or sets the title of the book.
- string Gatunek = string.Empty [get, set]
  Gets or sets the genre of the book.
- string Okladka = string.Empty [get, set]
  Gets or sets the cover image of the book.
- DateTime DataWydania [get, set]
  Gets or sets the publication date of the book.
- int LiczbaStron [get, set]
  Gets or sets the number of pages in the book.
- string Oprawa = string.Empty [get, set]
  Gets or sets the type of binding of the book.
- int Wydanie [get, set]
  Gets or sets the edition of the book.
- string ISBN = string.Empty [get, set]
  Gets or sets the ISBN of the book.
- int? BibliotekaId [get, set]
  Gets or sets the library ID where the book is located.
- virtual ? Biblioteka Biblioteka = null! [get, set]
  Gets or sets the library where the book is located.
- int AutorId [get, set]
  Gets or sets the author ID of the book.
- virtual Autor Autor = null! [get, set]
  Gets or sets the author of the book.
- virtual ICollection< Opinia > Opinie = new List<Opinia>() [get, set]
  Gets or sets the collection of reviews for the book.
- virtual ICollection< Wolumin > Woluminy = new List<Wolumin>() [get, set]
  Gets or sets the collection of volumes for the book.

7.42.1 Detailed Description

Represents a book in the library management system.

7.42.2 Property Documentation

7.42.2.1 Autor

```
virtual Autor ZarzadzanieBiblioteka.Models.Ksiazka.Autor = null!  [get], [set]
```

Gets or sets the author of the book.

7.42.2.2 AutorId

```
int ZarzadzanieBiblioteka.Models.Ksiazka.AutorId  [get], [set]
```

Gets or sets the author ID of the book.

7.42.2.3 Biblioteka

```
virtual ? Biblioteka ZarzadzanieBiblioteka.Models.Ksiazka.Biblioteka = null! [get], [set]
```

Gets or sets the library where the book is located.

7.42.2.4 BibliotekaId

```
int? ZarzadzanieBiblioteka.Models.Ksiazka.BibliotekaId [get], [set]
```

Gets or sets the library ID where the book is located.

7.42.2.5 DataWydania

```
DateTime ZarzadzanieBiblioteka.Models.Ksiazka.DataWydania [get], [set]
```

Gets or sets the publication date of the book.

7.42.2.6 Gatunek

```
string ZarzadzanieBiblioteka.Models.Ksiazka.Gatunek = string.Empty [get], [set]
```

Gets or sets the genre of the book.

7.42.2.7 Id

```
int ZarzadzanieBiblioteka.Models.Ksiazka.Id [get], [set]
```

Gets or sets the unique identifier for the book.

7.42.2.8 ISBN

```
string ZarzadzanieBiblioteka.Models.Ksiazka.ISBN = string.Empty [get], [set]
```

Gets or sets the ISBN of the book.

7.42.2.9 LiczbaStron

```
int ZarzadzanieBiblioteka.Models.Ksiazka.LiczbaStron [get], [set]
```

Gets or sets the number of pages in the book.

7.42.2.10 Okladka

```
string ZarzadzanieBiblioteka.Models.Ksiazka.Okladka = string.Empty [get], [set]
```

Gets or sets the cover image of the book.

7.42.2.11 Opinie

```
virtual ICollection<Opinia> ZarzadzanieBiblioteka.Models.Ksiazka.Opinie = new List<Opinia>()
[get], [set]
```

Gets or sets the collection of reviews for the book.

7.42.2.12 Oprawa

```
string ZarzadzanieBiblioteka.Models.Ksiazka.Oprawa = string.Empty  [get], [set]
```

Gets or sets the type of binding of the book.

7.42.2.13 Tytul

```
string ZarzadzanieBiblioteka.Models.Ksiazka.Tytul = string.Empty  [get], [set]
```

Gets or sets the title of the book.

7.42.2.14 Woluminy

```
virtual ICollection<Wolumin> ZarzadzanieBiblioteka.Models.Ksiazka.Woluminy = new List<Wolumin>()
[get], [set]
```

Gets or sets the collection of volumes for the book.

7.42.2.15 Wydanie

```
int ZarzadzanieBiblioteka.Models.Ksiazka.Wydanie  [get], [set]
```

Gets or sets the edition of the book.

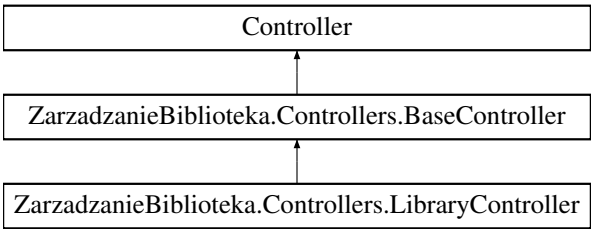
The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Models/Ksiazka.cs

7.43 ZarzadzanieBiblioteka.Controllers.LibraryController Class Reference

Controller for managing the library system. Provides functionality for books, authors, reviews, reservations, and loans.

Inheritance diagram for ZarzadzanieBiblioteka.Controllers.LibraryController:



Public Member Functions

- LibraryController (ApplicationDbContext dbContext, UserManager< Uzytkownik > userManager)

  Initializes a new instance of the LibraryController class.
- IActionResult Index (string SortujPo, string KwerendaWyszukujaca, int? Book1Id, string Gatunek)

  Displays the list of books in the library.
- IActionResult Add ()

  Displays the view with form allowing user to create a book.
- async Task< IActionResult > Add (Ksiazka ksiazka, IFormFile file)

  Add new book to the system.
- IActionResult Delete (int id)

  Displays view with form to confirm deleting book from the database.
- IActionResult ConfirmDelete (int id)

  Removes book from the database.
- IActionResult Edit (int id)

  Displays form allowing to update book informations.
- async Task< IActionResult > Edit (Ksiazka ksiazka, IFormFile file)

  Updates book informations.
- IActionResult IndexAuthors ()

  Displays all authors added to the database.
- IActionResult AddAuthor ()

  Displays view with form allowing adding new author to the database.
- IActionResult AddAuthor (Autor autor)

  Adds new author to the database.
- IActionResult EditAuthor (int id)

  Displays view with form allowing to edit existing author in the database.
- IActionResult EditAuthor (Autor autor)

  Makes changes to existing author in the database.
- IActionResult DeleteAuthor (int id)

  Deletes existing author from the database.
- IActionResult AddReview (int idKsiazka)

  Displays view with form allowing to add new review of the book pointed by idKsiazka.
- IActionResult AddReview (Opinia opinia, int IdKsiazka)

  Adds new review created by form to the database and links it with existing book.
- IActionResult EditReview (int id, int IdKsiazka)

  Displays view with form allowing to edit existing review of the book pointed by idKsiazka.
- IActionResult EditReview (Opinia opinia, int IdKsiazka)

  Edits existing review with data retrieved from form.
- IActionResult DeleteReview (int id)

  Deletes existing review from the database.
- IActionResult IndexLoans (string KwerendaWyszukujaca)

  Displays loans and reservations from the database.
- IActionResult IndexVolumes ()

  Displays list of all volumes for books from the database.
- IActionResult AddVolume (int id)

  Adds new volume for book from the database.
- IActionResult DeleteVolume (int id)

  Deletes volume from the database.
- IActionResult CancelReservation (int id, string KwerendaWyszukujaca)

  Cancels reservation of the book.
- IActionResult LoanVolume (int volId)

Display form to loan volume to the selected user.

- IActionResult LoanVolume (Wypozyczenie wypozyczenie)

  Loans first available volume to the selected user.
- IActionResult ReturnVolume (int id, string KwerendaWyszukujaca)

  Allows to return loaned volume.
- IActionResult AddReservation (int id)

  Makes reservation for the first available volume of the book.
- IActionResult ExtendLoan (int id, string KwerendaWyszukujaca)

  Extends the loan period of selected volume by 2 weeks.
- IActionResult CompareBooks (int book1Id, int book2Id)

  Compares selected books.
- IActionResult IndexManage ()

  Displays the list of library management exclusive functions.
- IActionResult BookDetails (int id)

  Displays view with details about selected book.

Public Member Functions inherited from ZarzadzanieBiblioteka.Controllers.BaseController

- BaseController (ApplicationDbContext dbContext)

  Initializes a new instance of the BaseController class.
- override void OnActionExecuting (ActionExecutingContext context)

  Executes before an action method is called. Retrieves book genres for use in a dropdown menu.

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Controllers.BaseController

- readonly ApplicationDbContext _dbContext

7.43.1 Detailed Description

Controller for managing the library system. Provides functionality for books, authors, reviews, reservations, and loans.

7.43.2 Constructor & Destructor Documentation

7.43.2.1 LibraryController()

```
ZarzadzanieBiblioteka.Controllers.LibraryController.LibraryController (
            ApplicationDbContext dbContext,
            UserManager< Uzytkownik > userManager)
```

Initializes a new instance of the LibraryController class.

Parameters

userManager	The user manager for handling user-related operations.
dbContext	The application database context.

7.43.3 Member Function Documentation

7.43.3.1 Add() [1/2]

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.Add ()
```

Displays the view with form allowing user to create a book.

Returns

A view with a form.

7.43.3.2 Add() [2/2]

```
async Task< IActionResult > ZarzadzanieBiblioteka.Controllers.LibraryController.Add (
            Ksiazka ksiazka,
            IFormFile file)
```

Add new book to the system.

Parameters

ksiazka	Object of class Ksiazka created in the form.
file	File containing cover of the added book.

Returns

A asynchronous task adding book to the database.

7.43.3.3 AddAuthor() [1/2]

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.AddAuthor ()
```

Displays view with form allowing adding new author to the database.

Returns

Returns the view with form.

7.43.3.4 AddAuthor() [2/2]

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.AddAuthor (
            Autor autor)
```

Adds new author to the database.

Parameters

autor	Object of class Autor filled with information from the form.

Returns

Returns redirection to view IndexAuthors.

7.43.3.5 AddReservation()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.AddReservation (
            int id)
```

Makes reservation for the first available volume of the book.

Parameters

id	Id number of the existing object of class Ksiazka.

Returns

Returns redirection to view Index, containing list of books.

7.43.3.6 AddReview() [1/2]

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.AddReview (
            int idKsiazka)
```

Displays view with form allowing to add new review of the book pointed by idKsiazka.

Parameters

idKsiazka	Id number of the existing object of class Ksiazka.

Returns

Returns the view with form.

7.43.3.7 AddReview() [2/2]

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.AddReview (
            Opinia opinia,
            int IdKsiazka)
```

Adds new review created by form to the database and links it with existing book.

Parameters

opinia	Object of the class Opinia created by the form.
idKsiazka	Id number of the existing object of class Ksiazka.

Returns

Returns redirection to view BookDetails.

7.43.3.8 AddVolume()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.AddVolume (
            int id)
```

Adds new volume for book from the database.

Parameters

id	Id number of the existing object of class Ksiazka.

Returns

Returns redirection to view IndexVolumes.

7.43.3.9 BookDetails()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.BookDetails (
            int id)
```

Displays view with details about selected book.

Parameters

id	Id number of the existing object of class Ksiazka.

Returns

Returs view which contains all available data about selected book.

7.43.3.10 CancelReservation()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.CancelReservation (
            int id,
            string KwerendaWyszukujaca)
```

Cancels reservation of the book.

Parameters

id	Id number of the existing object of class Rezerwacja.
KwerendaWyszukujaca	String that allows to filter and sort content of the view.

Returns

Returns redirection to view IndexLoans.

7.43.3.11 CompareBooks()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.CompareBooks (
            int book1Id,
            int book2Id)
```

Compares selected books.

Parameters

book1Id	Id number of the existing object of class Ksiazka.
book2Id	Id number of the existing object of class Ksiazka.

Returns

Returs redirection to view which contains comparison between selected books.

7.43.3.12 ConfirmDelete()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.ConfirmDelete (
            int id)
```

Removes book from the database.

Parameters

id	The id number of the book to be removed.

Returns

Returns view with list of all books.

7.43.3.13 Delete()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.Delete (
            int id)
```

Displays view with form to confirm deleting book from the database.

Parameters

id	The id number of the book to be removed.

Returns

Returns view with form to confirm delete.

7.43.3.14 DeleteAuthor()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.DeleteAuthor (
            int id)
```

Deletes existing author from the database.

Parameters

id	Id number of the existing object of class Autor.

Returns

Returns redirection to view IndexAuthors.

7.43.3.15 DeleteReview()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.DeleteReview (
            int id)
```

Deletes existing review from the database.

Parameters

id	Id number of the existing object of class Opinia.

Returns

Returns redirection to view BookDetails.

7.43.3.16 DeleteVolume()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.DeleteVolume (
            int id)
```

Deletes volume from the database.

Parameters

id	Id number of the existing object of class Wolumin.

Returns

Returns redirection to view IndexVolumes.

7.43.3.17 Edit() [1/2]

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.Edit (
            int id)
```

Displays form allowing to update book informations.

Parameters

id	The id number of the book to be edited. It allows to display already filled in form

Returns

Returns view with form to edit a book.

7.43.3.18 Edit() [2/2]

```
async Task< IActionResult > ZarzadzanieBiblioteka.Controllers.LibraryController.Edit (
            Ksiazka ksiazka,
            IFormFile file)
```

Updates book informations.

Parameters

id	The id number of the book to be edited.

Returns

Returns view with all books.

7.43.3.19 EditAuthor() [1/2]

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.EditAuthor (
            Autor autor)
```

Makes changes to existing author in the database.

Parameters

autor	Object of class Autor filled with edited information from the form.

Returns

Returns redirection to view IndexAuthors.

7.43.3.20 EditAuthor() [2/2]

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.EditAuthor (
            int id)
```

Displays view with form allowing to edit existing author in the database.

Parameters

id	Id number of the existing object of class Autor.

Returns

Returns the view with form.

7.43.3.21 EditReview() [1/2]

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.EditReview (
            int id,
            int IdKsiazka)
```

Displays view with form allowing to edit existing review of the book pointed by idKsiazka.

Parameters

id	Id number of the existing object of class Opinia.
idKsiazka	Id number of the existing object of class Ksiazka.

Returns

Returns the view with form.

7.43.3.22 EditReview() [2/2]

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.EditReview (
            Opinia opinia,
            int IdKsiazka)
```

Edits existing review with data retrieved from form.

Parameters

opinia	Updated object of the class Opinia by data from the form.
idKsiazka	Id number of the existing object of class Ksiazka.

Returns

Returns redirection to view BookDetails.

7.43.3.23 ExtendLoan()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.ExtendLoan (
            int id,
            string KwerendaWyszukujaca)
```

Extends the loan period of selected volume by 2 weeks.

Parameters

id	Id number of the existing object of class Wypozyczenie.
KwerendaWyszukujaca	String that allows to filter and sort content of the view.

Returns

Returns redirection to view IndexLoans, containing list of loans and reservations.

7.43.3.24 Index()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.Index (
            string SortujPo,
            string KwerendaWyszukujaca,
            int?  Book1Id,
            string Gatunek)
```

Displays the list of books in the library.

Returns

A view with a list of books.

7.43.3.25 IndexAuthors()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.IndexAuthors ()
```

Displays all authors added to the database.

Returns

Returns view with list of every author added to the system.

7.43.3.26 IndexLoans()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.IndexLoans (
            string KwerendaWyszukujaca)
```

Displays loans and reservations from the database.

Parameters

KwerendaWyszukujaca	String that allows to filter and sort content of the view.

Returns

Returns view with list of loans and reservations from the database.

7.43.3.27 IndexManage()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.IndexManage ()
```

Displays the list of library management exclusive functions.

Returns

Returns view with options designed for use by library employees.

7.43.3.28 IndexVolumes()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.IndexVolumes ()
```

Displays list of all volumes for books from the database.

Returns

Returns view with list of books and volumes from the database.

7.43.3.29 LoanVolume() [1/2]

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.LoanVolume (
            int volId)
```

Display form to loan volume to the selected user.

Parameters

volId	Id number of the existing object of class Wolumin.

Returns

Returns redirection to view IndexLoans or returns view with form.

7.43.3.30 LoanVolume() [2/2]

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.LoanVolume (
            Wypozyczenie wypozyczenie)
```

Loans first available volume to the selected user.

Parameters

wypozyczenie	Id number of the existing object of class Wypozyczenie.

Returns

Returns redirection to view IndexLoans.

7.43.3.31 ReturnVolume()

```
IActionResult ZarzadzanieBiblioteka.Controllers.LibraryController.ReturnVolume (
            int id,
            string KwerendaWyszukujaca)
```

Allows to return loaned volume.

Parameters

id	Id number of the existing object of class Wypozyczenie.
KwerendaWyszukujaca	String that allows to filter and sort content of the view.

Returns

Returns redirection to view IndexLoans.

The documentation for this class was generated from the following file:

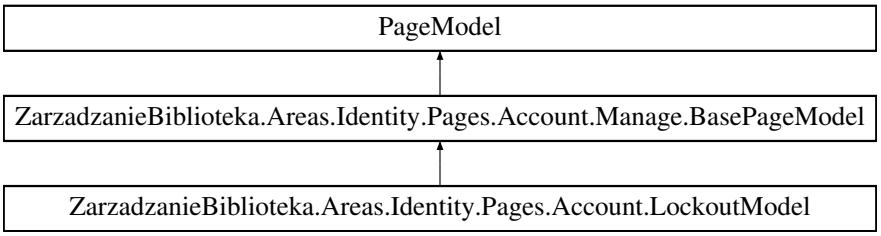
7.44 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LockoutModel Class Reference

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Inheritance diagram for ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LockoutModel:



Public Member Functions

- LockoutModel (ApplicationDbContext dbContext)
- void OnGet ()

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Public Member Functions inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- BasePageModel (ApplicationDbContext dbContext)
- override void OnPageHandlerExecuting (PageHandlerExecutingContext context)

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- readonly ApplicationDbContext dbContext

7.44.1 Detailed Description

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.44.2 Constructor & Destructor Documentation

7.44.2.1 LockoutModel()

```
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LockoutModel.LockoutModel (
            ApplicationDbContext dbContext)
```

7.44.3 Member Function Documentation

7.44.3.1 OnGet()

```
void ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LockoutModel.OnGet ()
```

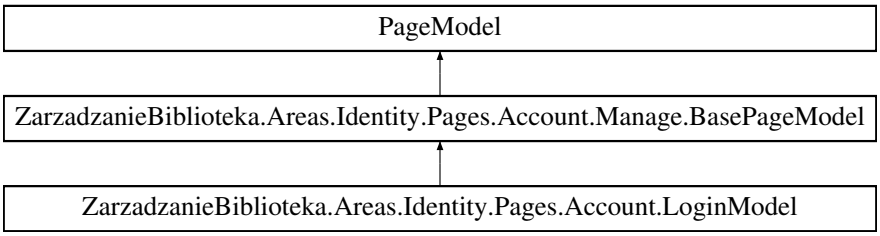
This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/Lockout.cshtml.cs

7.45 ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginModel Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginModel:



Classes

- class InputModel

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Public Member Functions

- LoginModel (ApplicationDbContext dbContext, SignInManager< Uzytkownik > signInManager, ILogger< LoginModel > logger)
- async Task OnGetAsync (string returnUrl=null)
- async Task< IActionResult > OnPostAsync (string returnUrl=null)

Public Member Functions inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- BasePageModel (ApplicationDbContext dbContext)
- override void OnPageHandlerExecuting (PageHandlerExecutingContext context)

Properties

- InputModel Input `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- IList< AuthenticationScheme > ExternalLogins `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string ReturnUrl `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.
- string ErrorMessage `[get, set]`

  This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

Additional Inherited Members

Protected Attributes inherited from ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.Manage.BasePageModel

- readonly ApplicationDbContext dbContext

7.45.1 Constructor & Destructor Documentation

7.45.1.1 LoginModel()

```
ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginModel.LoginModel (
            ApplicationDbContext dbContext,
            SignInManager< Uzytkownik > signInManager,
            ILogger< LoginModel > logger)
```

7.45.2 Member Function Documentation

7.45.2.1 OnGetAsync()

```
async Task ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginModel.OnGetAsync (
            string returnUrl = null)
```

7.45.2.2 OnPostAsync()

```
async Task< IActionResult > ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginModel.On↩
PostAsync (
            string returnUrl = null)
```

7.45.3 Property Documentation

7.45.3.1 ErrorMessage

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginModel.ErrorMessage  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.45.3.2 ExternalLogins

```
IList<AuthenticationScheme> ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginModel.↩
ExternalLogins  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.45.3.3 Input

```
InputModel ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginModel.Input  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

7.45.3.4 ReturnUrl

```
string ZarzadzanieBiblioteka.Areas.Identity.Pages.Account.LoginModel.ReturnUrl  [get], [set]
```

This API supports the ASP.NET Core Identity default UI infrastructure and is not intended to be used directly from your code. This API may change or be removed in future releases.

The documentation for this class was generated from the following file:

7.49 ZarzadzanieBiblioteka.Models.Opinia Class Reference

Represents a review in the library management system.

Properties

- int Id `[get, set]`

  Gets or sets the unique identifier for the review.
- string Komentarz = string.Empty `[get, set]`

  Gets or sets the comment for the review.
- byte Ocena `[get, set]`

  Gets or sets the rating for the review.
- int KsiazkaId `[get, set]`

  Gets or sets the book ID associated with the review.
- virtual Ksiazka Ksiazka = null! `[get, set]`

  Gets or sets the book associated with the review.
- string UzytkownikId `[get, set]`

  Gets or sets the user ID who wrote the review.
- virtual Uzytkownik Uzytkownik = null! `[get, set]`

  Gets or sets the user who wrote the review.

7.49.1 Detailed Description

Represents a review in the library management system.

7.49.2 Property Documentation

7.49.2.1 Id

```
int ZarzadzanieBiblioteka.Models.Opinia.Id  [get], [set]
```

Gets or sets the unique identifier for the review.

7.49.2.2 Komentarz

```
string ZarzadzanieBiblioteka.Models.Opinia.Komentarz = string.Empty  [get], [set]
```

Gets or sets the comment for the review.

7.49.2.3 Ksiazka

```
virtual Ksiazka ZarzadzanieBiblioteka.Models.Opinia.Ksiazka = null!  [get], [set]
```

Gets or sets the book associated with the review.

7.49.2.4 KsiazkaId

```
int ZarzadzanieBiblioteka.Models.Opinia.KsiazkaId  [get], [set]
```

Gets or sets the book ID associated with the review.

7.49.2.5 Ocena

```
byte ZarzadzanieBiblioteka.Models.Opinia.Ocena  [get], [set]
```

Gets or sets the rating for the review.

7.49.2.6 Uzytkownik

```
virtual Uzytkownik ZarzadzanieBiblioteka.Models.Opinia.Uzytkownik = null!  [get], [set]
```

Gets or sets the user who wrote the review.

7.49.2.7 UzytkownikId

```
string ZarzadzanieBiblioteka.Models.Opinia.UzytkownikId  [get], [set]
```

Gets or sets the user ID who wrote the review.

7.57 ZarzadzanieBiblioteka.Models.Rezerwacja Class Reference

Represents a reservation in the library management system.

Properties

- int Id `[get, set]`
  Gets or sets the unique identifier for the reservation.
- DateTime DataRezerwacji `[get, set]`
  Gets or sets the date of the reservation.
- DateTime DataWygasniecia `[get, set]`
  Gets or sets the expiration date of the reservation.
- int WoluminId `[get, set]`
  Gets or sets the volume ID associated with the reservation.
- virtual Wolumin Wolumin = null! `[get, set]`
  Gets or sets the volume associated with the reservation.
- string UzytkownikId `[get, set]`
  Gets or sets the user ID who made the reservation.
- virtual Uzytkownik Uzytkownik = null! `[get, set]`
  Gets or sets the user who made the reservation.

7.57.1 Detailed Description

Represents a reservation in the library management system.

7.57.2 Property Documentation

7.57.2.1 DataRezerwacji

```
DateTime ZarzadzanieBiblioteka.Models.Rezerwacja.DataRezerwacji  [get], [set]
```

Gets or sets the date of the reservation.

7.57.2.2 DataWygasniecia

```
DateTime ZarzadzanieBiblioteka.Models.Rezerwacja.DataWygasniecia  [get], [set]
```

Gets or sets the expiration date of the reservation.

7.57.2.3 Id

```
int ZarzadzanieBiblioteka.Models.Rezerwacja.Id  [get], [set]
```

Gets or sets the unique identifier for the reservation.

7.57.2.4 Uzytkownik

```
virtual Uzytkownik ZarzadzanieBiblioteka.Models.Rezerwacja.Uzytkownik = null!  [get], [set]
```

Gets or sets the user who made the reservation.

7.57.2.5 UzytkownikId

```
string ZarzadzanieBiblioteka.Models.Rezerwacja.UzytkownikId  [get], [set]
```

Gets or sets the user ID who made the reservation.

7.57.2.6 Wolumin

```
virtual Wolumin ZarzadzanieBiblioteka.Models.Rezerwacja.Wolumin = null!  [get], [set]
```

Gets or sets the volume associated with the reservation.

7.57.2.7 WoluminId

```
int ZarzadzanieBiblioteka.Models.Rezerwacja.WoluminId  [get], [set]
```

Gets or sets the volume ID associated with the reservation.

The documentation for this class was generated from the following file:

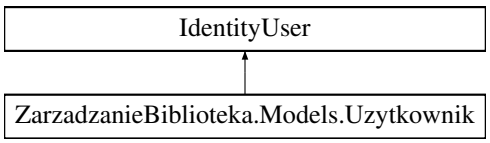
- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Areas/Identity/Pages/Account/↩ Manage/TwoFactorAuthentication.cshtml.cs

7.61 ZarzadzanieBiblioteka.Models.Uzytkownik Class Reference

Represents a user in the library management system.

Inheritance diagram for ZarzadzanieBiblioteka.Models.Uzytkownik:



Properties

- string Imie = string.Empty `[get, set]`

  Gets or sets the first name of the user.
- string Nazwisko = string.Empty `[get, set]`

  Gets or sets the last name of the user.
- int AccessLevel = 0 `[get, set]`

  Gets or sets the access level of the user.
- DateTime DataUrodzenia `[get, set]`

  Gets or sets the birth date of the user.
- virtual ICollection< Opinia > Opinie = new List<Opinia>() `[get, set]`

  Gets or sets the collection of reviews written by the user.
- virtual ICollection< Wypozyczenie > Wypozyczenia = new List<Wypozyczenie>() `[get, set]`

  Gets or sets the collection of borrowings made by the user.
- virtual ICollection< Rezerwacja > Rezerwacje = new List<Rezerwacja>() `[get, set]`

  Gets or sets the collection of reservations made by the user.

7.61.1 Detailed Description

Represents a user in the library management system.

7.61.2 Property Documentation

7.61.2.1 AccessLevel

```
int ZarzadzanieBiblioteka.Models.Uzytkownik.AccessLevel = 0  [get], [set]
```

Gets or sets the access level of the user.

7.61.2.2 DataUrodzenia

```
DateTime ZarzadzanieBiblioteka.Models.Uzytkownik.DataUrodzenia  [get], [set]
```

Gets or sets the birth date of the user.

7.61.2.3 Imie

```
string ZarzadzanieBiblioteka.Models.Uzytkownik.Imie = string.Empty  [get], [set]
```

Gets or sets the first name of the user.

7.61.2.4 Nazwisko

```
string ZarzadzanieBiblioteka.Models.Uzytkownik.Nazwisko = string.Empty  [get], [set]
```

Gets or sets the last name of the user.

7.61.2.5 Opinie

```
virtual ICollection<Opinia> ZarzadzanieBiblioteka.Models.Uzytkownik.Opinie = new List<Opinia>()
[get], [set]
```

Gets or sets the collection of reviews written by the user.

7.61.2.6 Rezerwacje

```
virtual ICollection<Rezerwacja> ZarzadzanieBiblioteka.Models.Uzytkownik.Rezerwacje = new
List<Rezerwacja>()  [get], [set]
```

Gets or sets the collection of reservations made by the user.

7.61.2.7 Wypozyczenia

```
virtual ICollection<Wypozyczenie> ZarzadzanieBiblioteka.Models.Uzytkownik.Wypozyczenia = new
List<Wypozyczenie>()  [get], [set]
```

Gets or sets the collection of borrowings made by the user.

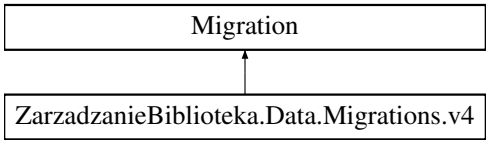
7.65 ZarzadzanieBiblioteka.Data.Migrations.v4 Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Data.Migrations.v4:



Protected Member Functions

- override void Up (MigrationBuilder migrationBuilder)
- override void Down (MigrationBuilder migrationBuilder)
- override void BuildTargetModel (ModelBuilder modelBuilder)

7.65.1 Detailed Description

7.65.2 Member Function Documentation

7.65.2.1 BuildTargetModel()

```
override void ZarzadzanieBiblioteka.Data.Migrations.v4.BuildTargetModel (
            ModelBuilder modelBuilder)  [protected]
```

7.65.2.2 Down()

```
override void ZarzadzanieBiblioteka.Data.Migrations.v4.Down (
            MigrationBuilder migrationBuilder)  [protected]
```

7.65.2.3 Up()

```
override void ZarzadzanieBiblioteka.Data.Migrations.v4.Up (
            MigrationBuilder migrationBuilder)  [protected]
```

The documentation for this class was generated from the following files:

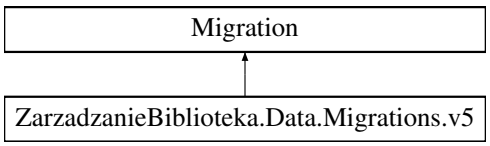
- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Data/Migrations/20241017221021_v4.Designer.cs

7.66 ZarzadzanieBiblioteka.Data.Migrations.v5 Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Data.Migrations.v5:



Protected Member Functions

- override void Up (MigrationBuilder migrationBuilder)
- override void Down (MigrationBuilder migrationBuilder)
- override void BuildTargetModel (ModelBuilder modelBuilder)

7.66.1 Detailed Description

7.66.2 Member Function Documentation

7.66.2.1 BuildTargetModel()

```
override void ZarzadzanieBiblioteka.Data.Migrations.v5.BuildTargetModel (
            ModelBuilder modelBuilder)  [protected]
```

7.66.2.2 Down()

```
override void ZarzadzanieBiblioteka.Data.Migrations.v5.Down (
            MigrationBuilder migrationBuilder)  [protected]
```

7.66.2.3 Up()

```
override void ZarzadzanieBiblioteka.Data.Migrations.v5.Up (
            MigrationBuilder migrationBuilder)  [protected]
```

The documentation for this class was generated from the following files:

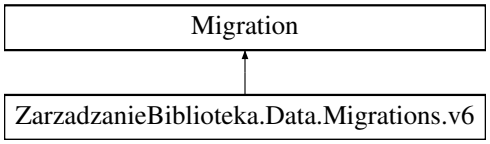
7.67 ZarzadzanieBiblioteka.Data.Migrations.v6 Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Data.Migrations.v6:



Protected Member Functions

- override void Up (MigrationBuilder migrationBuilder)
- override void Down (MigrationBuilder migrationBuilder)
- override void BuildTargetModel (ModelBuilder modelBuilder)

7.67.1 Detailed Description

7.67.2 Member Function Documentation

7.67.2.1 BuildTargetModel()

```
override void ZarzadzanieBiblioteka.Data.Migrations.v6.BuildTargetModel (
            ModelBuilder modelBuilder)  [protected]
```

7.67.2.2 Down()

```
override void ZarzadzanieBiblioteka.Data.Migrations.v6.Down (
            MigrationBuilder migrationBuilder)  [protected]
```

7.67.2.3 Up()

```
override void ZarzadzanieBiblioteka.Data.Migrations.v6.Up (
            MigrationBuilder migrationBuilder)  [protected]
```

The documentation for this class was generated from the following files:

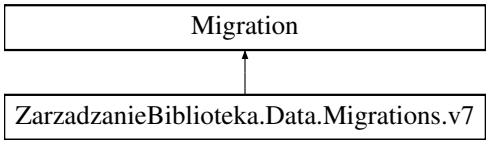
7.68 ZarzadzanieBiblioteka.Data.Migrations.v7 Class Reference

Inheritance diagram for ZarzadzanieBiblioteka.Data.Migrations.v7:



Protected Member Functions

- override void Up (MigrationBuilder migrationBuilder)
- override void Down (MigrationBuilder migrationBuilder)
- override void BuildTargetModel (ModelBuilder modelBuilder)

7.68.1 Detailed Description

7.68.2 Member Function Documentation

7.68.2.1 BuildTargetModel()

```
override void ZarzadzanieBiblioteka.Data.Migrations.v7.BuildTargetModel (
            ModelBuilder modelBuilder)  [protected]
```

7.68.2.2 Down()

```
override void ZarzadzanieBiblioteka.Data.Migrations.v7.Down (
            MigrationBuilder migrationBuilder)  [protected]
```

7.68.2.3 Up()

```
override void ZarzadzanieBiblioteka.Data.Migrations.v7.Up (
            MigrationBuilder migrationBuilder)  [protected]
```

The documentation for this class was generated from the following files:

7.70 ZarzadzanieBiblioteka.Models.Wolumin Class Reference

Represents a volume in the library management system.

Properties

- int Id [get, set]

  Gets or sets the unique identifier for the volume.
- virtual Ksiazka Ksiazka [get, set]

  Gets or sets the book associated with the volume.
- int KsiazkaId [get, set]

  Gets or sets the book ID associated with the volume.
- virtual ICollection< Wypozyczenie > Wypozyczenia = new List<Wypozyczenie>() [get, set]

  Gets or sets the collection of borrowings for the volume.
- virtual ICollection< Rezerwacja > Rezerwacje = new List<Rezerwacja>() [get, set]

  Gets or sets the collection of reservations for the volume.

7.70.1 Detailed Description

Represents a volume in the library management system.

7.70.2 Property Documentation

7.70.2.1 Id

```
int ZarzadzanieBiblioteka.Models.Wolumin.Id  [get], [set]
```

Gets or sets the unique identifier for the volume.

7.70.2.2 Ksiazka

```
virtual Ksiazka ZarzadzanieBiblioteka.Models.Wolumin.Ksiazka  [get], [set]
```

Gets or sets the book associated with the volume.

7.70.2.3 KsiazkaId

```
int ZarzadzanieBiblioteka.Models.Wolumin.KsiazkaId  [get], [set]
```

Gets or sets the book ID associated with the volume.

7.70.2.4 Rezerwacje

```
virtual ICollection<Rezerwacja> ZarzadzanieBiblioteka.Models.Wolumin.Rezerwacje = new List<Rezerwacja>()
[get], [set]
```

Gets or sets the collection of reservations for the volume.

7.70.2.5 Wypozyczenia

```
virtual ICollection<Wypozyczenie> ZarzadzanieBiblioteka.Models.Wolumin.Wypozyczenia = new
List<Wypozyczenie>()  [get], [set]
```

Gets or sets the collection of borrowings for the volume.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Models/Wolumin.cs

7.71 ZarzadzanieBiblioteka.Models.Wypozyczenie Class Reference

Represents a borrowing in the library management system.

Properties

- int Id `[get, set]`

  Gets or sets the unique identifier for the borrowing.
- DateTime DataWypozyczenia `[get, set]`

  Gets or sets the borrowing date.
- DateTime DataZwrotu `[get, set]`

  Gets or sets the return date.
- int WoluminId `[get, set]`

  Gets or sets the volume ID associated with the borrowing.
- virtual Wolumin Wolumin = null! `[get, set]`

  Gets or sets the volume associated with the borrowing.
- string UzytkownikId = string.Empty `[get, set]`

  Gets or sets the user ID who borrowed the volume.
- virtual Uzytkownik Uzytkownik = null! `[get, set]`

  Gets or sets the user who borrowed the volume.

7.71.1 Detailed Description

Represents a borrowing in the library management system.

7.71.2 Property Documentation

7.71.2.1 DataWypozyczenia

```
DateTime ZarzadzanieBiblioteka.Models.Wypozyczenie.DataWypozyczenia  [get], [set]
```

Gets or sets the borrowing date.

7.71.2.2 DataZwrotu

```
DateTime ZarzadzanieBiblioteka.Models.Wypozyczenie.DataZwrotu  [get], [set]
```

Gets or sets the return date.

7.71.2.3 Id

```
int ZarzadzanieBiblioteka.Models.Wypozyczenie.Id  [get], [set]
```

Gets or sets the unique identifier for the borrowing.

7.71.2.4 Uzytkownik

```
virtual Uzytkownik ZarzadzanieBiblioteka.Models.Wypozyczenie.Uzytkownik = null!  [get], [set]
```

Gets or sets the user who borrowed the volume.

7.71.2.5 UzytkownikId

```
string ZarzadzanieBiblioteka.Models.Wypozyczenie.UzytkownikId = string.Empty  [get], [set]
```

Gets or sets the user ID who borrowed the volume.

7.71.2.6 Wolumin

```
virtual Wolumin ZarzadzanieBiblioteka.Models.Wypozyczenie.Wolumin = null!  [get], [set]
```

Gets or sets the volume associated with the borrowing.

7.71.2.7 WoluminId

```
int ZarzadzanieBiblioteka.Models.Wypozyczenie.WoluminId  [get], [set]
```

Gets or sets the volume ID associated with the borrowing.

The documentation for this class was generated from the following file:

- C:/Users/klaud/source/repos/ZarzadzanieBiblioteka/ZarzadzanieBiblioteka/Models/Wypozyczenie.cs

- else

8.78.1 Function Documentation

8.78.1.1 AddControllersWithViews()

```
builder.Services.  AddControllersWithViews ()
```

8.78.1.2 AddDatabaseDeveloperPageExceptionFilter()

```
builder.Services.  AddDatabaseDeveloperPageExceptionFilter ()
```

8.78.1.3 AddDbContext< ApplicationDbContext >()

```
builder.Services.  AddDbContext< ApplicationDbContext > (
            options ,
            options.  UseSqlServerconnectionString)
```

8.78.1.4 AddDefaultIdentity< Uzytkownik >()

```
builder.Services.  AddDefaultIdentity< Uzytkownik > (
            options ,
            options.SignIn.  RequireConfirmedAccount = false)
```

8.78.1.5 AddTransient< EmailService >()

```
builder.Services.  AddTransient< EmailService > ()
```

8.78.1.6 if()

```
if (
            app.Environment.IsDevelopment() )
```

8.78.1.7 MapControllerRoute()

```
app.  MapControllerRoute (
            name:"default" ,
            pattern:"{controller=Library}/{action=Index}/{id?}" )
```

8.78.1.8 MapRazorPages()

```
app.  MapRazorPages ()
```

8.78.1.9 Run()

```
app.  Run ()
```

8.78.1.10 UseAuthorization()

```
app.  UseAuthorization ()
```

8.78.1.11 UseRouting()

```
app.  UseRouting ()
```

8.78.1.12 UseStaticFiles()

```
app.  UseStaticFiles ()
```

8.78.2 Variable Documentation

8.78.2.1 app

```
var app = builder.Build()
```

8.78.2.2 builder

```
var builder = WebApplication.CreateBuilder(args)
```

8.78.2.3 connectionString

```
var connectionString = builder.Configuration.GetConnectionString("DefaultConnection") ??  throw
new InvalidOperationException("Connection string 'DefaultConnection' not found.")
```

8.78.2.4 else

```
else
```

Initial value:

```
{
    app.UseExceptionHandler("/Home/Error")
```
